Using Formative Assessment to Drive Mathematics

Instruction in Grades

PreK-2 Jennifer Taylor-Cox

2013-09-27 Provide targeted

mathematics instruction for

every child. These books

combine formative assessment

with practical activities to

differentiate the elementary

classroom. The formative

assessments include student

work samples at varying levels.

The authors...Illustrate the

distinction between a

"traditional" assessment and an

"enhanced" assessment.

Describe specific differentiated

activities so each student may

consistently receive instruction

geared to specific need.

Provide teachers with

"Questions to Assess" to

determine what each child

understands about the math

concept. Show how to move

students to higher-level

mathematics thinking and to

apply math concepts. Include

extension activities to offer

challenging work for children

who have achieved skill

mastery level. Each activity

states a goal, the materials

needed, a description of the

activity, as well as specific

questions to ask students. The

assessments and activities are

aligned with the Common Core

State Standards for

Mathematics and the

expectations described by the

National Council of Teachers of

Mathematics. This resource

will help teachers, principals,

and curriculum directors

identify students' levels of

understanding about

mathematics and provide

concrete resources for

remediation, instruction, and

enrichment. These books are

also an excellent resource for

use during workshops and in-

class observations. Provide

targeted mathematics

instruction for every child.

Archaeological Illustration

Lesley Adkins 1989-08-25 This volume, originally published in 1989, is intended as a practical guide to archaeological illustration, from drawing finds in the field to technical studio drawing for publication. It is also an invaluable reference tool for the interpretation of illustrations and their status as archaeological evidence. The book's ten chapters start from first principles and guide the illustrator through the historical development of archaeological illustration and basic skills. Each chapter then deals with a different illustrative technique - drawing in the field during survey work and excavation, drawing

artefacts, buildings and reconstructions, producing artwork for publication and the early uses of computer graphics. Information about appropriate equipment, as well as a guide to manufacturers, is also supplied. An obvious and important feature of Archaeological Illustration is the 120 line drawings and half-tones which show the right - and the wrong - way of producing drawings. This volume will therefore be of interest to amateur and professional archaeologists alike.

American Woodworker

1990-08 American Woodworker magazine, A New Track Media publication, has been the premier publication for woodworkers all across America for 25 years. We are committed to providing woodworkers like you with the most accurate and up-to-date plans and information -- including new ideas, product and tool reviews, workshop tips and much, much more.

Scientists Must Write Robert Barrass 2005-06-29 This book, by a scientist, is not a textbook on English grammar: nor is it just one more book on how to write a technical report, or a thesis, or a paper for publication. It is about all the ways in which writing is important to scientists and engineers in helping them to remember to observe, to think, to plan, to organize and to communicate.
