Donahoe 1994 Written from the perspective of selectionist theory, this text presents a theoretically integrated approach to the study of animal learning and human cognition that co-ordinates behavioural research and research in neuroscience. It covers traditional topics such as acquisition and extinction of behaviour, stimulus control and schedules of reinforcement, and also deals with topics of student interest such as perception, memory, problem solving and verbal behaviour. All of these topics are discussed in terms of principles established by experimental analysis at the behavioural and neural levels, and scientific interpretation based on those principles.

*Rapeseed and Canola Oil* Frank Gunstone 2009-02-12 Rapeseed is now the second largest oilseed crop after soybean, and the third largest vegetable oil after soybean oil and palm oil, and it is therefore an important contributor to the annual supply of vegetable oils required to meet an increasing demand. This volume provides comprehensive coverage of rapeseed oil and its close relative, canola oil, from production (agronomic) aspects, through extraction to refining and processing. This is a book for oils and fats chemists and technologists in the food and oleochemical industries, chemical engineers in the processing industry, nutritionists and seed technologists.
