Perspectives in Business Informatics Research Andrzej Kobylinski 2013-08-23 This book constitutes a collection of selected contributions from the 12th International Conference on Perspectives in Business Informatics Research, BIR 2013, held in Warsaw, Poland, in September 2013. Overall, 54 submissions were rigorously reviewed by 41 members of the Program Committee representing 21 countries. As a result, 19 full and 5 short papers from 12 countries have been selected for publication in this volume. This book also includes the two keynotes by Witold Abramowicz and Bernhard Thalheim. The papers cover many aspects of business information research and have been organized in topical sections on: business process management; enterprise and knowledge architectures; organizations and information systems development; information systems and services; and applications.

Research on Professional Responsibility and Ethics in Accounting Cynthia Jeffrey 2010-01-20 Presents the research and cases that focus on the professional responsibilities of accountants and how they deal with the ethical issues they face. This title features articles on a broad range of important topics, including professionalism, social responsibility, ethical judgment, and accountability.

Encyclopedia of Decision Making and Decision Support Technologies Adam, Frederic 2008-04-30 As effective organizational decision making is a major factor in a company's success, a comprehensive account of current available research on the core concepts of the decision support agenda is in high demand by academicians and professionals. Through 110 authoritative contributions by over 160 of the world's leading experts the Encyclopedia of Decision Making and Decision Support Technologies presents a critical mass of research on the most up-to-date research on human and computer support of managerial decision making, including discussion on support of operational, tactical, and strategic decisions, human vs. computer system support structure, individual and group decision making, and multi-criteria decision making.

Paperless Trade: Opportunities, Challenges and Solutions Emmanuel Laryea 2002-01-01 A "digital divide" threatens the global trade regime. And it is not narrowing; it is rapidly becoming an unbridgeable chasm. Nor is this a problem merely for developing countries: the headlong trend toward dematerialisation of trade documents in the developed world will grind to a halt unless all trading countries without exception possess the legal and operational ability to participate in paperless trade. This challenging work not only describes the obstacles to universal support for paperless trade, but also provides solutions that can be implemented if stakeholders make the collective effort to achieve this most desirable (and in fact necessary) goal. Dr. Laryea investigates such central issues as the following: legal problems and security risks not encountered in paper documentation; accommodating low-tech problems with electronic documentation; and funding the construction of information and communication technology infrastructure in developing countries. The presentation focuses on each of the essential contract documents in turn, from the quotation to the documentary credit, explaining exactly how the electronic versions of each work (particularly in terms of security), and why each is desirable. As the first comprehensive set of practical proposals, from a truly global perspective, for the speedy dematerialisation of trade documents, Paperless Trade is essential reading for traders, practitioners,

academics, and national and international officials and policymakers engaged in facilitating world trade.

Strategic and Practical Approaches for Information Security Governance: Technologies and Applied Solutions Gupta, Manish 2012-02-29

Organizations, worldwide, have adopted practical and applied approaches for mitigating risks and managing information security program. Considering complexities of a large-scale, distributed IT environments, security should be proactively planned for and prepared ahead, rather than as used as reactions to changes in the landscape. Strategic and Practical Approaches for Information Security Governance: Technologies and Applied Solutions presents high-quality research papers and practice articles on management and governance issues in the field of information security. The main focus of the book is to provide an organization with insights into practical and applied solutions, frameworks, technologies and practices on technological and organizational factors. The book aims to be a collection of knowledge for professionals, scholars, researchers and academicians working in this field that is fast evolving and growing as an area of information assurance.
