**Autodesk Arnold Render User Guide for MAYA** Serdar Hakan DÜZGÖREN Arnold Arnold is an advanced cross-platform rendering library,

or API, used by a number of prominent organizations in film, television, and animation, including Sony Pictures Imageworks. It was developed as a photo-realistic, physically-based ray tracing alternative to traditional scanline based rendering software for CG animation. Arnold uses cutting-edge algorithms that make the most effective use of your computer's hardware resources: memory, disk space, multiple processor cores, and SIMD/SSE units. The Arnold architecture was designed to easily adapt to existing pipelines. It is built on top of a pluggable node system; users can extend and customize the system by writing new shaders, cameras, filters, and output driver nodes, as well as procedural geometry, custom ray types and user-defined geometric data. The primary goal of the Arnold architecture is to provide a complete solution as a primary renderer for animation and visual effects. However, Arnold can also be used as: A ray server for traditional scanline renderers. A tool for baking/procedural

generation of lighting data (lightmaps for videogames). An interactive rendering and relighting tool.

A Strategic Guide to Technical Communication - Second Edition (Canadian) Heather Graves

2011-12-20 A Strategic Guide to Technical Communication incorporates useful and specific strategies for writers to create aesthetically appealing and usable technical documentation. These strategies have been developed and tested on a thousand students from a number of different disciplines over twelve years and three institutions. The second edition adds a chapter on business communication, reworks the discussion on technical style, and expands the information on visual communication and ethics into free-standing chapters. Particular attention is paid throughout to the needs of Canadian students.

**Environmental Information in Instructions for Use of Consumer Products** Ari Nissinen

2005-03-11 The European Union has highlighted the issue of environmentally sound use of

products in the context of Integrated Product Policy, IPP. Accordingly, consumers should have easy access to understandable, relevant and credible environmental information. Information about product characteristics is available in different forms and sources, but in many cases, relevant environmental information is not available on the product itself. The study described in this report was initiated in order to produce information on the state of user instructions regarding environmental information. User manuals of passenger cars and refrigerators were focused on, examining the advice which could diminish the harmful environmental effects of the use of these products. Other studied products included such durable products as textiles and furniture as well as such consumables as cleaning chemicals and recyclable paper products. The study raised many ideas about actions that could promote the status and 'eco-development' of instructions for use.
