Project Finance for Construction Anthony Higham 2016-12-08 The world of construction is intrinsically linked with that of finance, from the procurement and tendering stage of projects right through to valuation of buildings. In addition to this, things like administrations, liquidations, mergers, take-overs, buy-outs and floatations affect construction firms as they do all other companies. This book is a rare explanation of common construction management activities from a financial point of view. While the practical side of the industry is illustrated here with case studies, the authors also take the time to build up an understanding of balance sheets and P&L accounts before explaining how common tasks like estimating or valuation work from this perspective. Readers of this book will not only learn how to carry out the tasks of a construction cost manager, quantity surveyor or estimator, they will also understand the financial logic behind them, and the motivations that drive senior management. This is an essential book for students of quantity surveying or construction management, and all ambitious practitioners.

Managing Facilities for Results Cheryl Bryan 2007-03-19 Carving out new service areas within existing space, forgoing massive additions or expensive new buildings, offers a cost-effective solution for budget-conscious libraries. Building from the proven Results Series model, this volume dovetails with the basics outlined in *The New Planning for Results: A Streamlined Approach*. This new hands-on workbook in the Results Series guides library directors, staff, and boards through the process to Prioritize new services that need space Make plans and identify an appropriate location Present the case to funding authorities Conduct a "gap analysis" Find resources to reallocate and see what new items are needed Identify building professionals to assist with alterations It's supplemented with 23 workforms to support the information and collection process. Three toolkits provide technical assistance on calculating square footage, assessing the message, and complying with the Americans with Disabilities Act (ADA) requirements. With examples ranging from small to large small public libraries, the process is equally valuable for school, special, and academic librarians who are faced with similar space repurposing challenges. Any library can embrace these practical, proven techniques for addressing community needs -- by creating a blueprint that prioritizes services and creates the space for them within their existing facility.
