**Party Politics in America** Paul Allen Beck 2000 The definitive text on American party politics, this highly- respected best-seller has been thoroughly updated through 2000. With comprehensive coverage of our party system (including third parties and independents), the text examines three primary components of the parties party organization, party in the electorate, party in government and the interaction of these components, especially during election campaigns. The authors integrate academic research with contemporary and historical examples of party politics in the United States, to bring to life the fascinating story of how parties have helped to shape our political system.

**Medical Education: Theory and Practice E-Book** Tim Dornan 2011-12-02 Medical Education: Theory and Practice is a new text linking the theory and the practice for graduate students and educators who want to go beyond the basics. The scholarship of medical education is, above all, a 'practice', but one that has a strong theoretical foundation. Neither theory nor practice stand still, and both are grounded in research. The novelty of this book lies in its interweaving of practice, theory, innovation and research. The book starts with a theorised, contemporary overview of the field. Next, it explores the theoretical foundations of medical education in depth. The remainder of the book

reviews a whole a range of educational contexts, processes and outcomes. This work has been edited by a distinguished, international team of medical educationalists and written by equally accomplished authors from across the globe representing a spectrum of disciplines. This will be an invaluable text for all Masters Students in health professions education as well as PhD students and education researchers wanting a background to the discipline. Educators and medical students will also find it a very useful resource. Written by key figures in medical educational research combined with a strong editorial influence from the international editorial team. The text has a strong evidence-based approach that is fully cognisant of research methodology issues, The book provides a scholarly explanation on the topic, rather than aiming to say the last word. Written throughout in a clear and comprehensible style. The content is extensively referenced with additional suggestions for further reading.

**Gender in the Political Science Classroom** Ekaterina M. Levintova 2018-07-12 A collection of studies examining the role of gender in teaching and learning in the traditionally male-dominated field of political science. Gender in the Political Science Classroom looks at the roles gender plays in teaching and learning in the traditionally male-dominated field of political science. The contributors to this collection bring a new perspective to investigations of gender issues in the political behavior literature and feminist pedagogy by uniting them with the

Scholarship of Teaching and Learning (SoTL). The volume offers a balance between the theoretical and the practical, and includes discussions of issues such as curriculum, class participation, service learning, doctoral dissertations, and professional placements. The contributors reveal the discipline of political science as a source of continuing gender-based inequities, but also as a potential site for transformative pedagogy and partnerships that are mindful of gender. While the contributors focus on the discipline of political science, their findings about gender in higher education are relevant to SoTL practitioners, other social-science disciplines, and the academy at large. "A bold and compelling collection that asks important questions about the ways in which the teaching of Political Science reproduces gender inequities." —Aeron Haynie

**The Promise of Participation** D. Altschuler 2013-11-27 To what extent does participation in one particular domain of public life lead to wider participation in other areas? Through the use of an unprecedented survey supported by case studies this book explores how participatory governance in community-managed schools can alter the civic and political behaviour of participants.
