Urban Bikeway Design Guide, Third Edition National Association of City Transportation Officials 2025-01-14 Over a decade ago, the first edition of the NACTO Urban Bikeway Design Guide sparked a design revolution in cities. City streets are now understood as key elements in confronting the intertwined safety, equity, and climate crises in North America. The completely revised and updated third edition of the NACTO Urban Bikeway Design Guide sets a new standard for street design in North America. Developed for cities, by cities, the new guide is more than a permission slip for better street design--it's a prescription for safe, connected, equitable bike networks. It captures lessons learned and emerging practices to set a new bar for the design of city streets. The NACTO Urban Bikeway Design Guide, Third Edition, will help city leaders and street designers meet the needs of our time. New topics address critical gaps in existing guidance for planning and project development. Contextual guidance for bikeway design encompasses the needs of a wider swath of potential riders, across genders, ages, races, ethnicities, incomes, and abilities. The guide offers substantive guidance for safe intersection design, with a focus on conflict reduction. It is a blueprint for implementing safe, connected, and equitable bike networks. Every transportation professional, from design to maintenance and from field staff to executives, needs a copy for their daily work. Praise for the second edition "NACTO's Urban Bikeway Design Guide gives American planners and designers the tools they need to make cycling accessible to more people." —Janette Sadik-Khan, former New York City Transportation Commissioner "This is an extraordinary piece of work that's long overdue." —Ray LaHood, former United States Secretary of Transportation "The guide will serve as an essential blueprint for safe, active, multi-modal streets." —Gabe Klein, former Chicago Transportation Commissioner "A Must-read... Landscape architects,

planners, and city officials should find this guide invaluable. Anyone who advocates for increasing bicycle infrastructure in our cities will find many useful tools for implementing best practice infrastructure."

Guidelines for the Construction, Format, and Management of Monolingual Controlled Vocabularies National Information Standards Organization (U.S.) 2005 This Standard presents guidelines and conventions for the contents, display, construction, testing, maintenance, and management of monolingual controlled vocabularies. This Standard focuses on controlled vocabularies that are used for the representation of content objects in knowledge organization systems including lists, synonym rings, taxonomies, and the thesauri. This Standard should be regarded as a set of recommendations based on preferred techniques and procedures. Optional procedures are, however, sometimes described, e.g., for the display of terms in a controlled vocabulary. This primary purpose of vocabulary control is to achieve consistency in the description of content objects and to facilitate retrieval. Vocabulary control is accomplished by three principal methods: defining the scope, or meaning, of terms; using the equivalence relationship to link synonymous and nearly synonymous terms; and distinguishing among homographs.

1999 European Wind Energy Conference E.L. Petersen 2014-01-02 The 1999 European Wind Energy Conference and Exhibition was organized to review progress, and present and discuss the wind energy business, technology and science for the future. The Proceedings contain a selection of over 300 papers from the conference. They represent a significant update to the understanding of this increasingly important

field of energy generation and cover a full range of topics.

European Symposium on Computer Aided Process Engineering - 11 R. Gani 2001-04-30 This book contains papers presented at the 11th Symposium of Computer Aided Process Engineering (ESCAPE-11), held in Kolding, Denmark, from May 27-30, 2001. The objective of ESCAPE-11 is to highlight the use of computers and information technology tools, that is, the traditional CAPE topics as well as the new CAPE topics of current and future interests. The main theme for ESCAPE-11 is process and tools integration with emphasis on hybrid processing, cleaner and efficient technologies (process integration), computer aided systems for modelling, design, synthesis, control (tools integration) and industrial case studies (application of integrated strategies). The papers are arranged in terms of the following themes: computer aided control/operations, computer aided manufacturing, process and tools integration, and new frontiers in CAPE. A total of 188 papers, consisting of 5 keynote and 183 contributed papers are included in this book.
