Web Development and Design Foundations with HTML5 Terry A. Morris 2013 Using Hands-On Practice exercises and Website Case Studies to motivate readers, Web Development and Design Foundations with HTML5 includes all the necessary lessons to guide students in developing highly effective websites. This textbook has an innovative approach that prepares students to design web pages that work today, in addition to being ready to take advantage of the new HTML5 coding techniques of the future. XHTML syntax is introduced, but the focus is on HTML5 syntax. New HTML5 elements are presented, with an emphasis on coding web pages that work in both current and future browsers. Urban Smellscapes Victoria Henshaw 2013-07-31 We see the city, we hear the city, but above all: we smell the city. Scent has unique qualities: ubiquity, persistence, and an unparalleled connection to memory, yet it has gone overlooked in discussions of sensory design. What scents shape

the city? How does scent contribute to placemaking? How do we design smell environments in the city? Urban Smellscapes makes a notable contribution towards the growing body of literature on the senses and design by providing some answers to these questions and contributing towards the wider research agenda regarding how people sensually experience urban environments. It is the first of its kind in examining the role of smell specifically in contemporary experiences and perceptions of English towns and cities, highlighting the perception of urban smellscapes as inter-related with place perception, and describing odour's contribution towards overall sense of place. With case studies from factories, breweries, urban parks, and experimental smell environments in Manchester and Grasse, Urban Smellscapes identifies processes by which urban smell environments are managed and controlled, and gives designers and city managers tools to actively use smell in their work.

The strategy also proposes accelerating the release of public sector land with capacity to build up to 100,000 new homes by 2015, and support up to 200,000 construction and related jobs during development.
