**Transform Your Math Class Using Asset-Based Teaching for Grades 6-12** Michael D. Steele 2024-07-19 Foster a love of mathematics by creating a more inclusive and empowering learning environment through asset-based teaching! An asset-based perspective on math

education means starting with what students already know instead of focusing on what's missing. This approach elevates student thinking and reasoning skills. In this way, educators acknowledge that all students bring prior experiences, strengths, talents, and resources to the learning process and can contribute meaningfully in an authentic learning environment. *Transform Your Math Class Using Asset-Based Teaching for Grades 6-12* provides insight into asset-based perspectives in mathematics education to create an environment where all students feel valued and capable of being doers of mathematics. In the book, Michael Steele and Joleigh Honey highlight the importance of using language, instructional routines, and systemic structure that positively impact student engagement, their math identity, and ultimately their outcomes. Providing a wealth of knowledge and practical strategies that can be used to transform math classrooms into inclusive, supportive, and empowering learning environments, this book: Introduces an asset-based perspective that focuses on students' strengths, assets, and potential to learn mathematics Includes a variety of frameworks and tools that teachers can use to build and grow their sense of asset-based perspectives Offers strategies for promoting a growth mindset in mathematics, encouraging productive struggle in math, and promoting equitable math instruction Supports teachers in reflecting on their decisions, self-awareness, and self-management Includes a companion online study guide to support teachers individually or as part of a professional learning community Adopting asset-based perspectives is about movement over time, not about flipping a switch. This book paves the path for an asset-based journey that ultimately helps to transform our math classrooms and advance all students' learning and development.

**Code-switching** Rebecca S. Wheeler 2006 Wheeler and Swords show K-6 teachers how to use code-switching and contrastive analysis to help students use prior knowledge to translate vernacular English into Standard English. When African American students write or say "Mama jeep is out of gas" or "The Earth revolve around the sun," many teachers--labeling this usage poor English or bad grammar--assume that their students have problems with possession or don't know how to make subjects and verbs agree. Forty years of linguistic research, however, demonstrates that the student is not making errors in Standard English--the child is writing or speaking correctly in the language patterns of the home and of the community. Building on the linguistic knowledge that children bring to school becomes the focus of this book, which advocates the use of "code-switching" to enable students to add another linguistic code-- Standard English--to their linguistic toolbox. Rather than drill the idea of "Standard English"

into students by labeling their home language as "wrong," the authors recommend teaching students to recognize the grammatical differences between home speech and school speech so that they are then able to choose the language style most appropriate to the time, place, audience, and communicative purpose. University researcher Rebecca Wheeler and urban elementary teacher Rachel Swords offer a practical, hands-on guide to code-switching, providing teachers with step-by-step instructions and numerous code-switching charts that can be reproduced for classroom use. The success of Wheeler's presentations in urban school districts and the positive results that Swords has observed in her own classroom speak to the effectiveness of the research and of this approach. While the book focuses on language use in the elementary classroom, the procedures and materials introduced can be easily adapted for middle and high school students.

**Content Area Reading and Learning** Diane Lapp 2005-04-11 How can teachers make content-area learning more accessible to their students? This text addresses instructional issues and provides a wealth of classroom strategies to help all middle and secondary teachers effectively enable their students to develop both content concepts and strategies for continued learning. The goal is to help teachers model, through excellent instruction, the importance of lifelong content-area learning. This working textbook provides students maximum interaction with the information, strategies, and examples presented in each chapter. **Content Area Reading and Learning: Instructional Strategies, Third Edition** is organized around five themes: Content Area Reading: An Overview The Teacher and the Text The Students The Instructional Program School Culture and Environment in Middle and High School Classrooms Pedagogical features: Each chapter includes a graphic organizer, a chapter overview, a Think Before Reading Activity, one or more Think While Reading Activities, and a Think After Reading Activity. The activities present questions and scenarios designed to integrate students' previous knowledge and experience with their new learnings about issues related to content area reading, literacy, and learning, and to serve as catalysts for thinking

and discussions. New in the Third Edition The latest information on literacy strategies in every content area Research-based strategies for teaching students to read informational texts Up-to-date information for differentiating instruction for English-speaking and non-English speaking students An examination of youth culture and the role it plays in student learning A look at authentic learning in contexts related to the world of work Ways of using technology and media literacy to support content learning Suggestions for using writing in every content area to enhance student learning Ideas for using multiple texts for learning content A focus on the assessment-instruction connection Strategies for engaging and motivating students **Content Area Reading and Learning: Instructional Strategies, Third Edition**, is intended as a primary text for courses on middle and high school content area literacy and learning.
