Critical Mobile Pedagogy John Traxler 2020-11-26 Critical Mobile Pedagogy is an exploration of mobile technologies for designing and delivering equitable and empowering education around the globe. Synthesizing a diverse range of projects and conceptual frameworks, this case-based collection addresses the ambitions, assumptions, and impacts of interventions in under-researched, often disadvantaged communities. The editors and authors provide a nuanced and culturally responsive approach to showcasing: indigenous, nomadic, refugee, rural, and other marginalized communities emerging pedagogies such as curation, open resources, massive open online courses (MOOCs), and self-directed learning contextual factors, including pedagogy, ethics, scaling, research methodology and culture, and consequences of innocuous or harmful implementation and deployment the nature of participation by global capital, multinationals, education systems, international agencies, national governments, and telecoms companies. Scholars, academics, policymakers, and program managers are increasingly using mobile technologies to support disadvantaged or disempowered communities in learning more effectively and appropriately. This book's diverse research precedents will help these and other stakeholders meet the challenges and

opportunities of our complex, increasingly connected world and work with greater cultural and ethical sensitivity at the intersection of education, research, and technology.

Advances in Human Factors and Systems Interaction Isabel L. Nunes 2020-06-30 This book presents cutting-edge research on innovative system interfaces, highlighting both lifecycle development and human-technology interaction, especially in virtual, augmented and mixed reality systems. It describes advanced methodologies and tools for evaluating and improving interface usability, and discusses new models, case studies and good practices. The book addresses the human, hardware, and software factors in the process of developing interfaces for optimizing total system performance, while minimizing costs. It also highlights the forces currently shaping the nature of computing and systems, such as the importance of portability and technologies for reducing power requirements; the need for better assimilation of computation in the environment; and solutions to promote computer and system accessibility for people with special needs. Based on the AHFE 2020 Virtual Conference on Human Factors and Systems Interaction, held on July 16–20, 2020, the book offers a timely survey and a practice-oriented guide for systems interface users and developers alike.
