FAA Needs to Improve Risk Assessment Processes for Its Air Transportation Oversight System

Air Carriers' Outsourcing of Aircraft

Maintenance David A. Dobbs 2009-03 This is a review of the FAA's oversight of air carriers' outsourced aircraft maintenance. As of July 14, 2008, there were 4,159 domestic and 709 foreign repair stations certificated by FAA to perform maintenance on U.S. aircraft. When an air carrier uses an FAA-certificated repair station to repair its aircraft or parts, the repair station's organization becomes an extension of the air carrier's maintenance organization. This report: (1) identifies the type and quantity of maintenance performed by external repair stations; and (2) determines whether FAA is effectively monitoring air carriers' oversight of external repair stations' work and verifying that safety requirements are met. Critical Lapses in Federal Aviation Administration's Safety Oversight of Airlines: Abuses of Regulatory

'Partnership' Programs James Oberstar 2009-12 Hearing to review the results of an oversight investigation. Two FAA Aviation Safety Inspectors have provided evidence raising serious questions of conduct violating the Fed. Aviation Reg's. (FARs) in the inspection and maint. program of Southwest Airlines (SWA). FAA employees have engaged in conduct, which constitutes a violation of Fed. law, rule or reg'n., gross mismgt., an abuse of authority and a substantial damage to public safety. The Maint. Inspector for SWA knowingly allowed the airline to operate in March 2007 (and possibly beyond), and well after the inspection deadlines on a mandatory FAA Airworthiness Directive. There may be a pattern of regulatory abuse and that these regulatory lapses may be more widespread. Illustrations.

Technical Manual Naval Air Systems Command 2018-10-19 Technical Order (TO) 1-1A-1 is one of a series of manuals prepared to assist personnel engaged in the general maintenance and repair of military aircraft. This manual covers general aircraft structural repair. This is a Joint-Service manual and some information may be directed at one branch of the service and not the other. Wherever the text of the manual refers to Air Force technical orders for supportive information, refer to the comparable Navy documents (see Table 1). The satisfactory performance of aircraft requires continuous attention to maintenance and repair to maintain aircraft structural integrity. Improper maintenance and repair techniques can pose an immediate and potential danger. The reliability of aircraft depends on the quality of the design, as well as the workmanship used in making the repairs. It is important that maintenance and repair operations be made according to the best available techniques to

eliminate, or at least minimize, possible failures. *Autotestcon '87* 1987
