Handbook of Research on Educational Communications and Technology J. Michael Spector 2013-07-03 The 4th edition of the Handbook of Research on Educational Communications and Technology expands upon the previous 3 versions, providing a comprehensive update on research pertaining to new and emerging educational technologies. Chapters that are no longer pertinent have been eliminated in this edition, with most chapters being completely rewritten, expanded, and updated. Additionally, new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest. Each chapter now contains an extensive literature review, documenting and explaining the most recent, outstanding research, including major findings and

methodologies employed. The Handbook authors continue to be international leaders in their respective fields; the list is cross disciplinary by design and great effort was taken to invite authors outside of the traditional instructional design and technology community.

Data Governance and Data Management Rupa Mahanti

2021-09-08 This book delves into the concept of data as a critical enterprise asset needed for informed decision making, compliance, regulatory reporting and insights into

trends, behaviors, performance and patterns. With good data being key to staying ahead in a competitive market, enterprises capture and store exponential volumes of data. Considering the business impact of data, there needs to be adequate management around it to derive the best value. Data governance is one of the core data management related functions. However, it is often overlooked, misunderstood or confused with other terminologies and data management functions. Given the pervasiveness of data and the importance of data, this book provides comprehensive understanding of the business drivers for data governance and benefits of data governance, the interactions of data governance function with other data management functions and various components and aspects of data governance that can be facilitated by technology and tools, the distinction between data management tools and data governance tools, the readiness

checks to perform before exploring the market to purchase a data governance tool, the different aspects that must be considered when comparing and selecting the appropriate data governance technologies and tools from large number of options available in the marketplace and the different market players that provide tools for supporting data governance. This book combines the data and data governance knowledge that the author has gained over years of working in different industrial and research programs and projects associated with data, processes and technologies with unique perspectives gained through interviews with thought leaders and data experts. This book is highly beneficial for IT students, academicians, information management and business professionals and researchers to enhance their knowledge and get guidance on implementing data governance in their own data initiatives.

European Climate Diplomacy in the USA and China Katrin

Buchmann 2022-08-22

Buchmann analyses the work of UK, German, Danish and Swedish embassies in the USA and China on climate change in the late 2000s and early 2010s.

She relates which coalitions and narratives embassies sought to develop to convince China and the United States that a more progressive climate policy was possible, to achieve gains supporting an agreement under the UNFCCC. This book shows that a key interpretation of climate

diplomacy was selling/trade: Europe selling technology

“solutions” to solve climate change. In this narrative, Europe has already done what needs to be done and outsourcing of production to China e.g. is ignored. In the USA, embassies entered coalitions with states, faith groups and the military, arguing that a more progressive climate policy was mandated by either God or security concerns. State politicians, including Democrats, often actually didn’t implement any climate policies. Any gains were reversed through climate denial lobbying funded by corporations. Embassies did not address this.

Brewmasters and Brewery

Creek Noëlle Phillips

2024-10-15 "A thorough investigation into the history of craft beer" —Kendall Hunter, author of *Beer Hiking Canadian Rockies* This rigorously researched deep dive into the history of craft beer in Vancouver makes an exciting addition to books on the city's history, certain to appeal to beer-lovers and history buffs alike. Few would dispute that these days Vancouver is a prime craft beer destination, with over 70 breweries in the greater Vancouver area and 35+ in Vancouver proper. Beer has shaped the city's culture, and

in turn, Vancouver's idiosyncratic identity has also shaped its craft beer. But how did it all begin? In this rigorously researched deep dive into the history of craft beer in Vancouver, beer historian and enthusiast Noëlle Phillips follows independent brewing from the city's inception in 1886 to the onset of prohibition in 1917 and, hopping over the "big beer" period of 1920–1980, delves into the explosion of micro, small-batch and craft breweries that dot the city's neighbourhoods today. She traces the smaller, lesser-known breweries, brewers, and owners through archival materials, newspaper accounts, and personal interviews. Along the way she uncovers stories and details that have been largely unknown even to local beer writers and aficionados. Illustrated with photos, original newspaper clippings, and maps, with stops into basement archives and sunlit tap rooms, Brewmasters and Brewery Creek is an inviting and exciting addition to books on

the city's history that will appeal to beer-lovers and history buffs alike.
