Resources in Education 1995

**Gems of Cincinnati's West End** LaVerne Summerlin 2020-06-18 This project began with my decision to interview and/or read about 100 alumni and/or their parents who were educated in those inner city Catholic schools between 1940-1970. Their personal stories are at the core of this narrative that details the Catholic church's impact on their lives. In addition, I wanted to write about the collaborative efforts of the members of the many religious orders and lay ministers who were instrumental in creating a disciplined, supportive and productive learning environment.

**Understanding the Math You Teach** Anita C. Burris 2005 Teaching strategies are grounded in the NCTM standards and illustrated with real student work. In addition, the author provides a full range of concrete developmental activities that encourage future teachers to make math make sense for themselves as well as for their students. Believing that teachers who are comfortable with mathematics develop learners who are comfortable with mathematics, this author empowers preservice preK-4 teachers to teach math confidently by laying a solid foundation of math concepts, and building on that foundation with engaging, meaningful, standards-based teaching methods. Integrated in this unique combined approach to teaching mathematics is a thorough discussion of math manipulatives, as well as the use of technology computer and otherwise to assist today's mathematics teacher. For educators, aids, and parents responsible for teaching Pre-K to fourth grade math.
