Online Counselor Education

Carl J. Sheperis 2015-12-01

Online Counselor Education: A Guide for Students is an all-new guide for online students in counselor education programs. Students in online environments face a number of challenges that could put them at a disadvantage unless they have a resource to help guide them through some of the confusing aspects of an online environment. Such challenges include the lack of understanding surrounding graduate school performance expectations, balancing graduate school and life, the inability to connect with community members and local field agencies, and various other aspects unique to an online environment. This text will help students through

these challenges and act as an invaluable resource.

Practice-based Learning in Higher Education Monica Kennedy 2015-02-10 This book addresses issues confronting universities' attempts to integrate practice-based learning in higher education curriculum, yet which reveals the jostling of cultures which exist within and amongst the academy, industry, government and professional bodies and other educational providers. The book engages theory in practices, and draws upon research highlighting the issues and transactions that emerge with implementation of

work integrated learning arrangements as uses these resources to discuss and develop further both theoretical premises and procedural contributions. The illustrative cases derive utilise metaphors of culture in their exploration of the epistemologies, structures, politics, histories and rituals which constrain program opportunity and success in making these advances. The volume comprises two main sections, the first laying out focal issues in the integration of learning and work in higher education. This section presents the issues at multiple levels of analysis and in theoretical terms. This section provides a foundation for the second section of the book which introduces a number of research studies illustrative of the issues theorised in the first. The cases highlight the practice of workplace and higher education pedagogy. They provide thick descriptions of experiences of integration and are explicitly focused on the implementation of work

integrated programs in higher education. The volume commences with an introductory chapter which sets out the range of issues addressed both theoretically and through illustration in the book and a final chapter critically reviews the contributions and acts to provide a cohesive picture of the learning practices of work and higher education and the possibilities of their integration.
