Representation, subjectivity and sexuality continue to be central to scholarly inquiry in the humanities and social sciences. *Deciphering Culture* explores their relationship, each author taking a distinct approach to the concept of 'curiosity' as a way of deciphering the working of particular cultural formations. In the process they address a variety of topics including: \* the

historical formation of subjectivities, identities and differences \* cultural conduct and habits of the self \* everyday cultures and negotiation \* consumption and the body \* memory, history and autobiography \* the ethics of critical and textual inquiry. This fascinating book will appeal to students and academics from a variety of disciplinary backgrounds in the social sciences and cultural studies.

Understanding Global Cultures Martin J. In addition to expanding the number of countries covered, the author introduces new conceptual frameworks for classifying cultures based on the works of Triandis, Fiske, and Huntington. These frameworks support students as they develop an increased awareness of various cultures and
