permission from the author, except in the case of brief quotations embodied in critical articles and reviews. What we expect from our fellow student and what are the facilities we provide them should have proper links for ensuring the maximum return of our efforts. We even come across instances during which children may revolt repeatedly to avoid scheduled intensive learning programmes duly planned for them. For efficient handling of such jobs we should go on planning content delivery mechanism on the basis of student centered curriculum design. It will even link up our plan with those of other fellow faculty members for making the effort a vibrant one. The work-book like this one and others of similar category has a comprehensive plan of addressing content areas duly specified by the boards of studies. Answer sheets are there for some selected test papers. Rest of the other sheets kept off the side for enabling the exploratory drive of fellow students active. We

strategies discussed are those commonly used by teachers in the classroom and are easily adapted to use in the library media center, allowing library teachers to support school-wide reading initiatives through instruction while sharing appreciation of literature. Reading strategies are incorporated in a chapter format, explaining the strategy and benefits of integration, as well as offering resources, a review of the relevant research, methods, and a clear step-by-step approach to instruction. Chapters share general knowledge about reading instruction, and illustrate how media specialists can incorporate specific examples, including reproducible items and graphic organizers. The overall outline of the book parallels the usual reading instructional pattern of strategies to use before, during, and after reading.
