Neutrosophic Sets and Systems, Vol. 83, 2025 Florentin Smarandache Volume 83 of "Neutrosophic Sets and Systems" features a diverse collection of research applying neutrosophic theory to address complex challenges across various fields, including information science, engineering, and healthcare. The papers in this volume present new models and methodologies that effectively handle uncertainty, indeterminacy, and imprecision. Significant theoretical contributions include the exploration of concepts like Neutrosophic Metric Spaces, Fermatean Neutrosophic Graphs, and SuperHyperSoft Sets, along with their applications in fields like energy supply systems and fixed-point theorems. The volume also highlights practical applications in multi-criteria decision-making (MCDM) for areas such as entrepreneurial education and civil litigation efficiency. Furthermore, research is presented on the use of neutrosophic logic with advanced technologies like deep learning and machine learning for tasks such as brain tumor medical image analysis and sleep disorder prediction. The collection also includes studies on risk management, digital media arts evaluation, and natural language processing. This volume demonstrates the expansive and evolving utility of neutrosophic theory in both foundational research and real-world problem-solving.

Exercise and Sport Science William E. Garrett 2000 Written by experts in exercise physiology, exercise science, and biomechanics, this volume focuses specifically on exercise science in relation to athletic performance and to the diagnosis, management, and prevention of athletic injuries. The text is logically organized into sections on energy metabolism, exercise physiology, organ system responses to exercise, general concerns in applied exercise science, sports biomechanics, and applied sports physiology. The biomechanics and sports physiology sections focus on particular sports, to determine specific diagnosis and treatment aspects. The book also includes chapters on exercise in children and the elderly, environmental influences on physical performance, overtraining, chronobiology, and microgravity.

The Impact of Music on Human Development and Well-Being Michele Biasutti 2020-07-17 Music is one of the most universal ways of expression and communication in human life and is present in the everyday lives of people of all ages and from all cultures around the world. Music represents an enjoyable activity in and of itself, but its influence goes beyond simple amusement. Listening to music, singing, playing, composing and improvising, individually and collectively, are common activities for many people: these activities not

only allow the expression of personal inner states and feelings, but also can bring many positive effects to those who engage in them. There is an increasing wealth of literature concerning the wider benefits of musical activity, and research in the sciences associated with music suggests that there are many dimensions of human life (physical, social, psychological—including cognitive and emotional) which can be affected positively by music. The impact that musical activity has on human life can be found in different processes, including a transfer of learning from the musical to another cognitive domain. Abilities that have been developed through music education and training may also be effectively applied in other cognitive tasks. Engagement in successful music activity may also have a positive impact on social skills and social inclusion, thus supporting the participation of the individual in collective and collaborative musical events. The promotion of social participation through music can foster many kinds of inclusion, including intercultural, intergenerational, and support for those who are differently abled. The aim of this Research Topic is to present a diverse range of original articles that investigate and discuss, in different ways, the crucial role that musical activity can play in human development and well-being.

The Ultimate Guide to Weight Training for Basketball Rob Price 2014-05-14 "The Ultimate Guide to Weight Training for Basketball" is the most comprehensive and up-to-date basketball-specific training guide in the world today. It contains descriptions and photographs of nearly 100 of the most effective weight training, flexibility, and abdominal exercises used by athletes worldwide. This book features year round basketball-specific weight training programs guaranteed to improve your performance and get you results. No other basketball book to date has been so well designed, so easy to use, and so committed to weight training. This book will have players increasing strength, power, agility, and overall quickness on the court, leading to an increase in rebounds, steals, blocked shots, and overall defensive efficiency. You will build the strength and power needed to dominate the post and under the basket and you will build the stamina and endurance needed to go strong until the final whistle. Both beginners and advanced athletes and weight trainers can follow this book and utilize its programs. From recreational to professional, thousands of athletes all over the world are already benefiting from this book and its techniques, and now you can too! **Strength Training for Basketball** Javair Gillett 2020 Strength Training for Basketball will help you create a basketball-specific resistance training program to help athletes at each position--guard, forward, or center--develop strength and successfully transfer that strength to the basketball court.

Ds Performance Strength & Conditioning Training Program for Basketball, Strength, Intermediate D. F. J. Smith 2016-12-02 A 12 week strength & conditioning training program for Basketball, focusing on strength development for an intermediate level. DS Performance have created an exclusive series of sport specific, strength & conditioning training programmes that have underpinning, evidence based training methods, which have been put in place to improve your performance for all ages and abilities. All programmes have been designed to develop each specific performance variable through the progression of intensity and volume. Along with your training program this book contains a supporting guide to mobility training. This guide uses myofascial release, static stretching and activation work to mobilise the major body parts used in training. It has been put in place to increase your mobility, it can also be used to support your warm-ups and cool downs. To aid your training, we also included a series of tables to create your lifting percentages. These tables will help you work out your working percentages from 40%-95%. The tables are broken down into 5% loads, all in kilograms, ranging from 10kg-300kg All programmes by DS Performance are 12 weeks in duration, we recommend that you do two, six week training blocks, with a de-loading week between the two training blocks. This will allow the body to recover, prepare you for the second training phase and reduce any risk of injury. While in Basketball no two players are exactly alike in size, shape or skill level, players must always improve their on-court

performance by developing key physical attributes. Because becoming a great basketball player is so much more than just refining the skills that are on display on the court, they need to develop speed, power, agility and strength for improved performance. This is why our programmes have been designed to develop the key physical attributes for Basketball. Covering the essential physical aspects to Basketball is just as important as putting the time in on the court. Choose your current training level, Amateur, Intermediate and Advanced for the variable you would like to train and progress your way up to "Advanced" to really improve your performance. The three levels, Amateur, Intermediate and Advanced represents more your current training age, experience and skill level. Because weight training and other training methods have a completely different set of skills required when lifting and training correctly, compared to your sport. DS Performance training programmes are written to run alongside a skill/sport specific based training plan. DS Performance programmes provide sessions for 3 days of training a week, to alternate between your skill/sport specific training sessions. DS Performance has selected five of the most important physical performance variables/attributes for each of the sports that are essential in developing your performance. DS Performance strength & conditioning training programmes have been written for 20 of the most popular sports globally, the sports selected have a wide range of physical attributes and together we have targeted the primary performance variables, to develop them for increases in your personal performance. DS Performance has been developed to bring elite training methods to everyone, from all levels of sporting ability. The mission of DS Performance is to make training programmes utilised by professional athletes available to all sporting enthusiasts and performers. DS Performance are providing you with training programmes designed by ex-Team GB athletes and coaching staff that have the practical and applied experience through a wide range of individual and team based sports. Combined with the vast experience an International athlete has on training and peak performance, who also are qualified to a minimum of Post Graduate level, in the form of Masters Degrees in Sport Science, Strength & Conditioning.
