This book documents the whole story of this milestone model with the aid of more than 200 photographs. It includes: the story of the model's origins as the L30 project when BMW owned Land Rover; the styling, engineering and specification changes introduced over the lifetime of L322 from 2001 to 2012 and a chapter on the model's career in the USA. There is an overview of the aftermarket enhancements from the leading specialists of the day. performance and reduce costs. Zeroing in on the most useful response

can be a challenge; this ninth edition cuts through the confusion. Well-

organized and highly readable, *The Consumer Guide to Home Energy*

*Savings* begins with an overview of the interrelationships between

energy use, economics, and the environment. Chapters focus on specific

areas in the home, such as electronics, lighting, heating, cooling,

ventilation, kitchen, and laundry, and provide helpful explanations for

each, including: Describing energy use characteristics Drawing

comparisons between available technologies Outlining the most cost-

effective repair and replacement options Providing step-by-step guidance

for finding the right equipment Describing how the equipment operates

Summarizing how much energy is used or lost Included are tips on

improving existing equipment and guidance for when and why

consumers should purchase new energy-efficient equipment, as well as a

reminder to check local government and utility incentives for purchase

or retrofit grants. This guide will be an invaluable resource to all

consumers concerned about reducing both their energy bills and their

environmental impact. Jennifer Thorne Amann is a senior associate in the

ACEEE (American Council for an Energy-Efficient Economy) Buildings

and Equipment Program. Alex Wilson is president of BuildingGreen, Inc., author of *Your Green Home*, and executive editor of *Environmental Building News*.
