Future and Communication J. Rosenhouse 1997 Rosenhouse, Gitay and Porush of ITT/Technion have collaborated in creating a collection of essays based on the First International Conference on Future and Communication and the role of scientific and technical communication and translation in technology development and transfer. The primary aim of this major international conference was to explore how scientific and industrial matters could be run more efficiently throughout the world by utilizing modern communication methods and systems. Particular emphasis was placed on enhancing the interaction between the industry and the universities using various areas of written communication and translation studies. Within this important work are summaries from the presentations made at the conference. Among the critical matters discussed were aspects of technical as well as scientific translation in the 21st century, the communications challenges of the future, and their likely outcomes, matching language curriculum to emerging high technology needs and paradigms and finally, an intriguing section on the state of technical writing in Israel and the Middle East.

ISO 14001 EMS Implementation Handbook

Hewitt Roberts 1998 The ISO14000 Implementation Handbook is a practical handbook for the successful development, implementation and maintenance of an environmental management system (EMS) as dictated by the international environmental management system standard ISO14001 and the European Regulation EMAS. The Handbook is a comprehensive and step-by-step source of practical assistance for anyone wishing to implement and maintain an EMS. Whether the user is aiming for full system certification/registration or wishing only to get the EMS ball rolling, this Handbook provides essential help and support for the discerning environmental manager wishing to systematically improve corporate environmental management. The Handbook covers all steps of the EMS implementation process for the initial environmental review to auditing, reviewing the system and preparing for certification. All the essential components of EMS development, implementation and maintenance are covered in an in-depth and chapter-by-chapter basis. Each chapter is supplemented by: * recommendations, * checklists, * templates, * certification tips, * helpful hints, * case study materials, and * Internet-based support, multimedia case studies and software. The Handbook will cut through confusion, academia and rhetoric to provide users with practical, user-friendly support and information required for implementing and maintaining a successful EMS. Practical handbook designed for regular use and support Includes recommendations, checklists, electronic and hardcopy templates, optional software, case studies and Internet based multimedia and case studies Better value and closer focused material than competing titles.

Programming the Web with Visual Basic .NET Lynn Torkelson 2002-07-30 Programming the Web with Visual Basic .NET is a comprehensive guide to building web applications and services using Visual Basic .NET. It is written especially for experienced Visual Basic programmers who use Visual Studio .NET for their development work, even those who have never written a web application before. Because the .NET Framework simply blows away the archaic tools previously available to web programmers, the authors predict that many Visual Basic programmers who successfully avoided Web programming in the past will now bring their expertise to the Web. However, even experienced web programmers will greatly benefit from the authors' thorough coverage of the ASP.NET namespaces and their clear coverage of the ADO.NET classes most important to Web applications that use relational databases for data storage. All developers will benefit from the authors' extensive practical advice (based on their unique professional backgrounds) about how to produce create high-quality code and how to create professional, usable websites. After reading Programming the Web with Visual Basic .NET, you'll understand how to build and deploy top-quality, professionally designed, highly usable web applications using Visual Basic .NET.
