

Dpf N4 Communication Question Paper

China and the Internet Song Shi 2023-12-15 Two oversimplified narratives have long dominated news reports and academic studies of China's Internet: one lauding its potentials to boost commerce, the other bemoaning state control and measures against the forces of political transformations. This bifurcation obscures the complexity of the dynamic forces operating on the Chinese Internet and the diversity of Internet-related phenomena. China and the Internet analyzes how Chinese activists, NGOs, and government offices have used the Internet to fight rural malnutrition, the digital divide, the COVID-19 pandemic, and other urgent problems affecting millions of people. It presents five theoretically informed case studies of how new media have been used in interventions for development

and social change, including how activists battled against COVID-19. In addition, this book applies a Communication for Development approach to examine the use and impact of China's Internet. Although it is widely used internationally in Internet studies, Communication for Development has not been rigorously applied in studies of China's Internet. This approach offers a new perspective to examine the Internet and related phenomena in Chinese society.

Overcoming Asymmetric Information in the

Crowdfunding Market Ana

Odorović 2025-10-25

Crowdfunding has gained increasing attention from regulators and policymakers worldwide, yet responses have varied due to its hybrid

position between direct and intermediated finance, diverse business models, and limited evidence on market failures that would justify regulatory intervention. This book provides a comprehensive analysis of how market- and regulatory-based mechanisms of investor protection interact in the crowdfunding sector and proposes a risk-based regulatory framework. It compares financial-return crowdfunding to traditional finance actors, examines how information asymmetry is addressed through voluntary disclosure, issuer signalling, and platform gatekeeping, and explores the economic functions of self-regulatory frameworks adopted by crowdfunding associations in Europe. The book then turns to the role of law in addressing residual risks and accommodating the re-intermediation roles of platforms. Finally, it presents empirical evidence on the effects of the UK's bespoke crowdfunding regulation on market outcomes. This book

will appeal to scholars and students in law, economics, and finance, as well as to regulators and policymakers seeking a deeper understanding of crowdfunding markets and their regulation.

Digitalization and the Future of Financial Services

Darko B. Vukovic 2022-09-20

This book develops insights of digitalization and the future of financial services to originate an innovative approach to financial field, in order to underpin research and practice in the wide area of digital finance. The aim of this book is to extend our understandings on how digitalization and the future of financial services can be helpful in different business circumstances in many cross-functional financial areas, such as financial markets, financial risk management, financial technologies, investment finance, etc. Thus, the book aims at addressing the relevance of digital finance for different players, highlighting differences in tools and processes as well as identifying innovative practices in

financial digitalization. This can result in some novel theoretical and practical insights that can foster financial players, in order to proactively explore and exploit opportunities in financial digitalization and offset financial risks and increase efficiency.

Handbook of Research on Political Activism in the Information Age Solo, Ashu M. G. 2014-05-31 Technology, and particularly the Internet, has caused many changes in the realm of politics. Mainstream media no longer has a monopoly on political commentary as social media, blogs, and user-generated video streaming sites have emerged as an outlet for citizens and political activists to openly voice their opinions, organize political demonstrations, and network online. The Handbook of Research on Political Activism in the Information Age includes progressive research from more than 39 international experts at universities and research institutions across 15

different countries. Each of the 25 scholarly chapter contributions focus on topics pertaining to the application of information technology, engineering, and mathematics to political activism. Through its analysis of the methods for political activism in the information age, the effectiveness of these methods, as well as emerging analytical tools, this book is designed for use by researchers, activists, political scientists, engineers, computer scientists, journalists, professors, students and professionals working in the fields of politics, e-government, media and communications, and Internet marketing.

Robots That Love Judith A. Markowitz 2025-10-30 In a world of increasingly sophisticated AI, the relationship between creator and creation has shifted. Robot lovers coexist with humans, and the boundaries of emotion and consciousness are blurred. This book considers the fundamental challenge of imbuing robots with the

capacity to experience love, delving into the consequences of loving robots that can only feign reciprocation and philosophical questions about sentience and consciousness. Other forms of artificial lovers are also discussed, ranging from ChatGPT and Samantha from the 2013 film *Her* to a variety of sex dolls, monsters, golems and romanceable characters in dating-simulation games. Such entities encompass an array of sexual and gender identities as well as gender biases involved in creating the "perfect" artificial companion and developing AI systems. These biases, often perpetuated by deep-learning algorithms, underscore the need for critical reflection amid the evolution of AI.
