Space Safety is No Accident

Tommaso Sgobba 2015-06-04
Includes the proceedings from
the 7th IAASS Conference,
"Space Safety is No Accident,"
held in Friedrichshafen,
Germany, in October 2014. The
7th IAASS Conference, "Space
Safety is No Accident" is an
invitation to reflect and
exchange information on a
number of topics in space
safety and sustainability of
national and international
interest. The conference is also

a forum to promote mutual
understanding, trust and the
widest possible international
cooperation in such matters.
The once exclusive "club" of
nations with autonomous sub-
orbital and orbital space access
capabilities is becoming
crowded with fresh and
ambitious new entrants. New
commercial spaceports are
starting operations and others
are being built. In the manned
spaceflight arena a commercial
market is becoming a tangible
reality with suborbital
spaceflights and government
use of commercial services for
cargo and crew transportation
to orbit. Besides the national
ambitions in space, the
international cooperation both
civil and commercial is also
gaining momentum. In the
meantime robotic space
exploration will accelerate and
with it the need to
internationally better regulate
the usage of nuclear power
sources. Space-bound systems

and aviation traffic will share more and more a crowded airspace, while aviation will increasingly rely on space-based safety-critical services. Finally, most nations own nowadays space assets, mainly satellites of various kinds and purposes, which are under the constant threat of collision with other spacecraft and with the ever increasing number of space debris. Awareness is increasing internationally (as solemnly declared since decades in space treaties) that space is a mankind asset and that we all have the duty of caring for it. Without proactive and courageous international initiatives to organize space, we risk to negate access and use of space to future generations.
