Electronic Media Criticism Peter B. Orlik 2001 Given the prominence of the electronic media in the 21st century, it is crucial that both media professionals and consumers know how to decipher and evaluate media content, the assumptions on which that content is based, and the constraints to which it is subject. *Electronic Media Criticism* offers a variety of critical approaches to audio and video discourse. Rather than restricting itself to one perspective, the book applies key aesthetic, sociological, philosophical, psychological, structural, and economic principles to arrive at a comprehensive evaluation of both programming and advertising content. Maintaining the approach of the original volume, this second edition includes: * updated chapters to reflect the current media world, including sample reviews and illustrations, * material pertaining to "new media"--because the book is process-oriented rather than medium-oriented, Internet referents are interspersed in discussion of the various critical perspectives, * two additional scripts for critical analysis--an episode of *The Simpsons* and an installment of the dark Canadian comedy *The Newsroom*, and * new exercises for further practice in applying critical procedures. Orlik interweaves the insights of industry and academic authorities, recognizing that both orientations are essential in the development of a valid and viable critical outlook. Written for media students and practitioners, all readers of this volume

will gain feasible and flexible tools for focused and rational analysis of electronic media products, as well as improved understanding of the role and essential ingredients of criticism itself.

Writing for Visual Media Anthony Friedmann 2014-04-16 This updated edition of *Writing for Visual Media* will enable you to understand the nature of visual writing that lies behind the content of all visual media. This unique kind of writing must communicate to audiences through content producers, since audiences don't read the script. Most media content provides a solution to a communication problem, which the

writer must learn to analyze and solve before writing the script. The Fourth Edition strengthens the method for creating content and writing in the correct language and established format for each visual medium, including commercial communication such as ads and PSAs, corporate communications, and training. An extended investigation into dramatic theory and how entertainment narrative works is illustrated by examples and detailed analysis of scenes, scripts and storylines, designed to save writers from typical pitfalls and releasing your creative powers of invention. Writing for Visual Media will help you to develop an improved foundation for understanding interactive media and writing for non-linear content, while gaining the tools to effectively connect with your audience like a professional. Purchase of this book includes access to the companion website, which provides: Sample scripts and video clips of those produced scripts An interactive glossary of camera shots, movements, and transitions Storyboards, scripts, screenplays, and links to industry resource Instructor materials such as PowerPoint lecture slides, a sample syllabus, and a test bank.
