Assessing English Language Learners in the Content Areas Florin Mihai 2010-06-11 Assessing English Language Learners in the Content Areas: A Research-into-Practice Guide for Educators seeks to provide guidance to classroom teachers, staff developers, and test-item designers who want to improve ELL assessment outcomes, particularly in the areas of math, science and social studies. The first two chapters of the book establish the background for the discussion of content-area assessment for ELLs, examining several important characteristics of this rapidly growing student population (as well as critical legislation affecting ELLs) and providing a description of various forms of assessment, including how ELL assessment is different from the assessment of English-proficient students. Important assessment principles that educators should use in their evaluation of tests or other forms of measurement are provided. Other chapters review ELL test accommodations nationwide (because, surprisingly, most teachers do not know what they can and cannot allow) and the research on the effectiveness of these types of accommodations. The book analyzes the characteristics of alternative assessment; it discusses three popular alternative assessment instruments (performance assessment, curriculum-based measurement, and portfolios) and makes recommendations as to how to increase the validity, reliability, and practicality of alternative assessments. The book proposes fundamental assessment practices to help content area teachers in their evaluation of their ELL progress.

Rehabilitation and Alternative Medicine in the Healthcare for Chronic Rheumatic Pain Disorders

Ching-Mao Chang 2025-11-18 Chronic Rheumatic Pain Disorders, such as rheumatoid arthritis, fibromyalgia, osteoarthritis, and gout, represent a significant healthcare challenge due to their substantial economic burden and the persistent, often unmanageable, inflammation that conventional pharmacotherapy can't always alleviate efficiently. The limitations in efficacy and potential side effects associated with standard medications have led many sufferers to seek alternative solutions. This trend underscores the urgent need to research and validate the effectiveness of rehabilitation and alternative medicine in this context. Our research topic aims to investigate the therapeutic possibilities and evidence-based medical quality of complementary treatments like physical therapy, acupuncture, and mindfulness practices. By doing so, we aspire to discover viable, complementary approaches to managing chronic rheumatic pain disorders, offering patients and healthcare providers new pathways to relief and an improved quality of life. Our focus lies on exploring the following themes: • Evaluating the effectiveness of physical therapy and manual techniques in managing Chronic Rheumatic Pain Disorders • The role of mind-body practices - yoga, Tai Chi, and meditation - in Chronic Rheumatic Pain Disorders • Complementary approaches such as acupuncture, electroacupuncture, and chiropractic adjustments for Chronic Rheumatic Pain Disorders • Integrative Medicine: combining conventional and complementary therapies for Chronic Rheumatic Pain Disorders • The impact of lifestyle modifications and biofeedback techniques on Chronic Rheumatic Pain Disorders We welcome the submission of manuscripts including original research articles, reviews, mini reviews, general commentary, hypothesis & theory, brief research reports, case reports, clinical trials, methods, perspective articles, study protocols, and systematic reviews. Relevant manuscripts for this article collection will cover topics such as (but not limited to): • Physical Therapy Techniques (e.g., therapeutic exercise, manual therapies) • Incorporation of Exercise routines • Acupuncture and Electroacupuncture methods • Chiropractic Adjustments • Massage Therapy • Tai Chi practices • Yoga and Pilates techniques • Biofeedback and Neurofeedback methods • Mindfulness and Meditation practices
