Lab Manual for General, Organic, and

Biochemistry Denise Guinn 2009-08-21

Teaching all of the necessary concepts within the constraints of a one-term chemistry course can be challenging. Authors Denise Guinn and Rebecca Brewer have drawn on their 14 years of

experience with the one-term course to write a textbook that incorporates biochemistry and organic chemistry throughout each chapter, emphasizes cases related to allied health, and provides students with the practical quantitative skills they will need in their professional lives. Essentials of General, Organic, and Biochemistry captures student interest from day one, with a focus on attention-getting applications relevant to health care professionals and as much pertinent chemistry as is reasonably possible in a one term course. Students value their experience with chemistry, getting a true sense of just how relevant it is to their chosen profession. Small Wastewater System Operation and

Maintenance Kenneth D. Kerri 1997 This manual

is designed to train operators in the practical, hands-on aspects of safely operating and maintaining small wastewater collection, treatment, and disposal systems. It focuses on the knowledge and skills needed to operate and maintain several types of package wastewater treatment processes. It also describes various effluent disposal options, how to perform basic lab procedures, and how to administer a small wastewater system.
