The Observation Protocol for Academic Literacies Magaly Lavadenz 2024-01-16 This book presents a validated observation instrument to support and further develop the pedagogic expertise of teachers of English Learners in US schools. Based on sociocultural and second language teaching and learning theories, the Observation Protocol for Academic Literacies (OPAL) has a variety of uses across teacher preparation programs, pre-K-12 classroom contexts and school districts. This book leads the reader through the process of using OPAL with real classroom observations in the form of vignettes, in order to develop confidence and reliability scoring evidence in research-based practices. The book provides examples of its non-evaluative uses to conduct research, support teachers and identify areas of strength and weakness in their professional development. It also offers researchers and

policymakers a tool for collecting classroom-based evidence to inform the implementation and refinement of English Learner programs. *Math Word Wall, Grade K*

Archaeology of Self Yolanda Sealey-Ruiz 2026-06-29 *Archaeology of Self: The Introspective Educator's Guide to Racial Literacy* is an invitation to dive deep into the heart of teaching and the sacred work of self-awareness. It calls educators—and professionals from all walks of life—to embark on a lifelong journey of racial literacy, healing, and the pursuit of a bias-free existence. Blending personal narrative, poetry, and guided reflection, *Archaeology of Self* offers both a mirror and a map that takes readers through Dr. Yolanda Sealey-Ruiz's framework for excavating one's racial identity, confronting internalized bias, and teaching from a place of critical love, justice, and truth. This is more than a book. It is a living, breathing guide for transformation. Included within are: Lesson plans designed by educators across the country and adaptable for K-12 and beyond. Multimodal resources, including video suggestions, journaling prompts, mindfulness practices, and companion readings. A chapter-themed music playlist that sets the emotional and intellectual tone, inviting deep listening, feeling, and reflection. At its core, *Archaeology of Self: The Introspective Educator's Guide to Racial Literacy* is a blueprint for healing and for the collective reimagining of education as a liberatory and humanizing force.

Common Core for the Not-So-Common Learner, Grades K-5

Maria G. Dove 2013-03-13 The strategies you need to teach common standards to diverse learners The elementary years are a critical opportunity to help students of all backgrounds meet the demands of the Common Core Standards. In this realistic, thorough book, Maria Dove and Andrea

Honigsfeld show how to help every K-5 student, including English Learners, students with disabilities, speakers of nonstandard English, and other struggling learners, meet the Common Core Standards for English Language Arts (ELA). Educators will find an adaptable approach that ensures all students develop lasting language skills. This resource familiarizes readers with each of the Common Core's 32 ELA anchor standards. Outlines the specific skills that students need to master each standard. Presents a wealth of flexible teaching strategies and instructional tools aligned to each anchor standard. Includes guidance on collaboration and co-teaching for student success. Common Core for the Not-So-Common Learner is the standards-based ELA resource that elementary teachers have been waiting for! "Each anchor standard in all five domains is fully explained with practical, engaging activities that can add fun and learning to any classroom. Readers will feel supported and energized for the challenges ahead, with a toolkit for meeting the needs of all learners." --Elizabeth Gennosa, English/AIS Teacher Sagamore Middle School, Holtsville, NY "Here's a resource that will make your teaching life easier and support those learners in your classroom who worry you the most." --Dolores Hennessy, Reading Specialist Hill and Plain School, New Milford, CT

Common Core Sense Christine Moynihan 2023-10-10 Since the introduction of Common Core State Standards, many elementary teachers struggled with unpacking these processes and figuring out how to implement them in the classroom. Author Christine Moynihan introduces *Common Core Sense: Tapping the Power of Mathematical Practices* with the goal of making the eight Standards for Mathematical Practice more accessible and explicit. The Standards for Mathematical Practice provide a solid foundation for encouraging students to think, reason, and persevere like mathematicians. In her book, Moynihan demonstrates what each practice might look, sound, and feel like in the classroom by using the four-part GOLD framework: G - Go for the Goals: What are the major purposes of this practice? O - Open Your Eyes & Observe: What should you see the students doing as they utilize the practice? What should you see yourself doing

as the teacher? L - Listen: What should you hear students saying as they use the practice? What should you hear yourself saying? D - Decide What to Do: What actions as a teacher must you put in to place to mine the gold of the practice? Each chapter is dedicated to one practice and includes student work samples, classroom vignettes, and teacher thoughts. The consistent framework of the book outlines an easy way to learn and deepen the understanding of each practice. It provides teachers the planning and support they need to mine the GOLD.
