College Algebra Marvin A. Bittinger 2005 With
a visual, graphical approach that emphasizes
connections among concepts, this text helps
students make the most of their study time. The
authors show how different mathematical ideas
are tied together through their zeros, solutions,
and x-intercepts theme; side-by-side algebraic
and graphical solutions; calculator screens; and
examples and exercises. By continually
reinforcing the connections among various
mathematical concepts as well as different
solution methods, the authors lead students to
the ultimate goal of mastery and success in
class.

Encyclopaedia of Mathematics Michiel

Hazewinkel 2012-12-06 This ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathematics. It is a translation with updates and editorial comments of the Soviet Mathematical Encyclopaedia published by 'Soviet Encyclopaedia Publishing House' in five volumes in 1977-1985. The annotated translation consists of ten volumes including a special index volume. There are three kinds of articles in this ENCYCLOPAEDIA. First of all there are survey-type articles dealing with the various main directions in mathematics (where a rather fine subdivision has been used). The main requirement for these articles has been that they should give a reasonably complete up-to-date account of the current state of affairs in these areas and that they should be maximally accessible. On the whole, these articles should be understandable to mathematics students in their first specialization years, to graduates from other mathematical areas and, depending on the specific subject, to specialists in other domains of science, engineers and teachers of mathematics. These articles treat their material at a fairly general level and aim to give an idea of the kind of problems, techniques and concepts involved in the area in question. They also contain background and motivation rather than precise statements of precise theorems with detailed definitions and technical details on how to carry out proofs and constructions. The second kind of article, of medium length, contains more detailed concrete problems, results and techniques.

Conic Sections in Context [Lesson Plan]

Elizabeth Richardson 2011 This project is a discovery-based, multi-sensory unit composed of a series of lessons designed to teach high school students about conic sections. This four-week

unit focuses on developing students' abilities to identify and/or create mathematical rules from tangible patterns. applications of conic sections. Its primary purpose is to examine conic sections and create connections between the geometric and algebraic definitions. As well, this unit is designed to challenge students to discover modern day Activities of this unit include: computer-based explorations of conic sections, discussions of the etymology of each conic section, construction of each conic section using rope and sidewalk chalk, discovery of the standard formula for each conic section, and individual and group presentations on artistic creations and modern day applications of conic sections. This unit is designed to be presented in the second semester of an Algebra II course. Throughout this unit, students work in a number of environments to meet the need of each learning style. As well, students reflect daily in the form of a minute paper. These daily reflections facilitate an ongoing assessment of classroom dynamics. Having been implemented at Los Alamos High School in March of 2011, assessment of student success and unit plan effectiveness included: samples of students' work, comparison of students' pretest & post-test results, and a review of student and colleague reflections, personal progress analysis, and unit evaluation surveys. Overall, assessment data supports the conclusion that this unit successfully fulfilled the target goals. In addition, assessment data suggests the following revisions of the plan: starting the unit with a webquest to establish relevancy, reorganizing the unit to address one conic section each lesson using a variety of approaches, and differentiating assessment.
