*Breaking Through* Edward F. Ricketts Jr.  
2006-05-20 Trailblazing marine biologist,  
visionary conservationist, deep ecology  
philosopher, Edward F. Ricketts (1897-1948)  
has reached legendary status in the California  
mythos. A true polymath and a thinker ahead of  
his time, Ricketts was a scientist who worked in  
passionate collaboration with many of his  
friends—artists, writers, and influential  
intellectual figures—including, perhaps most  
famously, John Steinbeck, who once said that  
Ricketts's mind "had no horizons." This  
unprecedented collection, featuring previously  
unpublished pieces as well as others available  
for the first time in their original form, reflects  
the wide scope of Ricketts's scientific,  
philosophical, and literary interests during the  
years he lived and worked on Cannery Row in  
Monterey, California. These writings, which  
together illuminate the evolution of Ricketts's  
unique, holistic approach to science, include  
"Verbatim transcription of notes on the Gulf of  
California trip," the basic manuscript for  
Steinbeck's and Ricketts's Log from the Sea of  
Cortez; the essays "The Philosophy of Breaking  
Through" and "A Spiritual Morphology of  
Poetry;" several shorter pieces on topics  
including collecting invertebrates and the  
impact of modernization on Mexican village life;

and more. An engaging critical biography and a number of rare photographs offer a new and richly detailed view of Ricketts's life.

*Mircea Eliade* Nicolae Babuts 2017-07-28

Mircea Eliade (1907-1986) was one of the twentieth century's foremost students of religion and cultural environments. This book examines the emergence, function, and value of religion and myth in his work. Nicolae Babuts, Robert Ellwood, Eric Ziolkowski, John Dadosky, Robert Segal, Mac Linscott Ricketts, Douglas Allen, and Liviu Borda examine Eliade's views on the interaction between the sacred and the profane. Each explores Eliade's phenomenological approach to the study of religion and myth. They show that modern rites of initiation, cultural activities, and spectacles like bullfighting, film, and, perhaps surprisingly, reading and writing, all harken back to the archetypal structures of the mythical imagination. Perhaps the greatest achievement of Eliade's phenomenological approach is that it reveals what we have in common with pre-Socratic man: the mind's structural capacity to endow objects and events with spiritual values and meanings. As a study of Eliade's concept of the mythic imagination, the book posits an analogy between the myths of the past and modern imitations. The authors suggest that in spite of their differences and their separate historical sources, myths represent basic structures of human consciousness. This book is essential reading for all students of religion, philosophy, and literature.
