The P-STAT User's Manual 1986

A Critical Analysis of Principles of Teaching as a Basic Course in Teacher-training Curricula Samuel Andrew Krusé 1929

Industrial Management John Robertson Dunlap 1919

A Guide to Systematic Instructional Design Martin R. Wong 1974 A step-by-step exposition is presented of the manner in which the systematic application of the principles of instructional design can lead to sequential learning. Following an introduction to systematic instructional design, the second and third chapters of the book discuss a systems model of the classroom and the setting of objectives for systematic instruction. The next two chapters analyze the task to be taught and classify learning tasks and optimum learning conditions. Chapter six deals with the selection of methods and media and chapter seven with synthesizing components and preparing teaching plans, their evaluation, and the provision for feedback relating to the instructional system.

Embedded Systems Design using the MSP430FR2355

LaunchPad™ Brock J. LaMer 2020-06-19 This textbook for courses in Embedded Systems introduces students to necessary concepts, through a hands-on approach. LEARN BY EXAMPLE - This book is designed to teach the material the way it is learned, through example. Every concept is supported by numerous programming examples that provide the reader with a step-by-step explanation for how and why the computer is doing what it is doing. LEARN BY DOING - This book targets the Texas Instruments MSP430 microcontroller. This platform is a widely popular, low-cost embedded system that is used to illustrate each concept in the book. The book is designed for a reader that is at their computer with an MSP430FR2355 LaunchPad™ Development Kit plugged in so that each example can be coded and run as they learn. LEARN BOTH ASSEMBLY AND C - The book teaches the basic operation of an embedded computer using assembly language so that the computer operation can be explored at a low-level. Once more complicated systems are introduced (i.e., timers, analog-to-digital converters, and serial interfaces), the book moves into the C programming language. Moving to C allows the learner to abstract the operation of the lower-level hardware and focus on understanding how to "make things work". BASED ON SOUND PEDAGOGY - This book is designed with learning outcomes and assessment at its core. Each section addresses a specific learning outcome that the student should be able to "do" after its completion. The concept checks and exercise problems provide a rich set of assessment tools to measure student performance on each outcome.

A Handbook of Basic Skills and Strategies for Beginning Teachers Robert E. MacDonald 1991

Standard Catalog: Sociology Section H.W. Wilson Company 1918

The Instructional Leadership Toolbox Sandra Lee Gupton 2003 This book offers a set of metaphorical, cognitive tools to assist educators in growing professionally and to hone their teaching and learning skills in their own unique settings. Chapter 1 helps the reader understand the importance that all educators, especially principals as instructional leaders, possess and strategically use an internal compass when making decisions. Chapter 2 deals with the importance of school leaders being reflective and well-read about today's leadership issues, such as understanding accountability and standards for 21st-century school principals, and being up-to-date and aware of a principal's key role in instructional leadership. Chapter 3 is about basic processes and products that guide the daily operation of the school and channel its energy most appropriately toward students and learning. Chapter 4 provides insight into ensuring that a school's culture is positive and centered on teaching and learning. Chapter 5 focuses on communication conduits. Reflective practice, supportive supervision, and cooperative evaluation are main topics of chapter 6. Chapter 7 emphasizes the instructional leadership lens in guiding one's work and decision-making. Chapter 8 covers the tools of accountability. Chapter 9 focuses on proactive leadership for school improvement. Chapter 10 returns focus to the leader as an individual, rounding out the importance of self-understanding. (Contains 177 references.) (RT).
