Research on Tibetan Spelling Formal Language and Automata with Application Nyima Tashi 2018-06-20 This book applies formal language and automata theory in the context of Tibetan computational linguistics;

further, it constructs a Tibetan-spelling formal grammar system that generates a Tibetan-spelling formal language group, and an automata group that can recognize the language group. In addition, it investigates the application technologies of Tibetan-spelling formal language and automata. Given its creative and original approach, the book offers a valuable reference guide for researchers, teachers and graduate students in the field of computational linguistics.
