Teaching Science With Interactive Notebooks Kellie Marcarelli

2010-05-18 "Easy to read, with good examples and illustrations. The rationale is spelled out for every step, the setup for the interactive notebook is clearly explained, and you can hear the enthusiasm of the author, which makes the reader enthusiastic about trying the strategy." —Maria Mesires, Seventh-Grade Science Teacher Case Middle School, Watertown, NY "In an era when science teachers are being asked more and more to teach writing skills and build science literacy, this book presents an engaging and creative way to answer that challenge and encourage the use of higher-order thinking skills." —Michael Baker, Eighth-Grade Science Teacher Memorial Middle School, Albany, OR Increase student learning in the inquiry-based science classroom!

Interactive notebooks allow students to record and analyze observations, reflect on their learning, and self-assess their work. Teaching Science With Interactive Notebooks gives educators a step-by-step process for introducing interactive notebooks to students and using notebooks to develop students' communication skills, cognitive organization skills, and sense of responsibility for their own learning. Packed with examples from actual student notebooks, this detailed guide explains the unique features that make interactive notebooks more effective tools than conventional notebooks for science classrooms. This resource: Describes the nuts and bolts of implementing interactive notebooks, including execution, time management, and grading Uses the 5E Learning Cycle (engage, explore, elaborate, extend, evaluate) as the framework for science instruction Emphasizes the importance of writing in science and provides strategies for modeling effective writing Explores strategies to encourage collaborative student inquiry and foster whole-class discussions By implementing interactive notebooks in your classroom, you can gain deeper insight into each student's understanding, learning progress, and thinking!

[Story Starters and Science Notebooking](#) Sandy Buczynski 2009-05-19

Story Starters and Science Notebooking: Developing Student Thinking Through Literacy and Inquiry is designed to provide a meaningful, comfortable framework in which teachers and parents can encourage elementary children to explore scientific ideas in an inquiry-oriented format. The basis for each scientific concept presented in Story Starters and Science Notebooking is embedded in a story appropriate for elementary-aged children. The activity that follows each narrative encourages learners to observe, compare, gather data, organize or classify, and draw conclusions about the problem posed from the story. Because current scientific knowledge and understanding guide scientific investigations, background information in each chapter provides teachers with a synopsis of the scientific concept involved in the activity for that story. The story starters present a framework for inquiry, which eliminates the free-wheeling, uncontrolled, and unstructured view some teachers have of inquiry. These are either original stories or familiar children's stories that ask learners to investigate a possible scientific explanation for a problem or scenario. Learners then communicate their findings in an oral, written, pictorial, or technological form back to a lead

character from the story. Extension activities provide an opportunity for learners to compare their answers with what scientists already know about the world and also motivate them to frame new questions. Grades 3-6

Science Interactive Notebook - Grades 1 to 3 Virtual Co-Teacher

2019-07-11 Busy teachers will love this 8.5 x 11 blank interactive composition notebook. Regular notebooks used for the cut-and-paste interactive notebook activities are usually smaller than legal size paper and teachers have to guess how much smaller they should print the activity papers. Note anymore. This blank lined journal for Grades 1-3 is bigger than regular notebooks. This is actually a blank book with 3 pages of fill-in the blank Table of Content, space for putting unique page numbers that will help your student differentiate left and right pages and a set of stars at the bottom of each page where you can put your immediate input or grade.
