The Oxford weekly record of Christian and temperance work [afterw.] and blue ribbon journal

Charting Spiritual Care Simon Peng-Keller 2020-08-10 This open access volume is the first academic book on the controversial issue of including spiritual care in integrated electronic medical records (EMR). Based on an international study group comprising researchers from Europe (The Netherlands, Belgium and Switzerland), the United States, Canada, and Australia, this edited collection provides an overview of different charting practices and experiences in various countries and healthcare contexts. Encompassing case studies and analyses of theological, ethical, legal, healthcare policy, and practical issues, the volume is a groundbreaking reference for

future discussion, research, and strategic planning for inter- or multi-faith healthcare chaplains and other spiritual care providers involved in the new field of documenting spiritual care in EMR. Topics explored among the chapters include: Spiritual Care Charting/Documenting/Recording/Assessment Charting Spiritual Care: Psychiatric and Psychotherapeutic Aspects Palliative Chaplain Spiritual Assessment Progress Notes Charting Spiritual Care: Ethical Perspectives Charting Spiritual Care in Digital Health: Analyses and Perspectives Charting Spiritual Care: The Emerging Role of Chaplaincy Records in Global Health Care is an essential resource for researchers in interprofessional spiritual care and healthcare chaplaincy, healthcare chaplains and other spiritual caregivers (nurses, physicians, psychologists, etc.),

practical theologians and health ethicists, and church and denominational representatives.

Paediatric Chaplaincy Paul Nash 2018-04-19 Drawing on a range of approaches developed by paediatric chaplaincy teams worldwide, this edited collection provides best principles, practices and skills of chaplaincy work with neonates, infants, children, young people and their families. By engaging with paediatric chaplaincy from an international, multifaith perspective, contributors from around the world and different faith traditions show what good spiritual, religious and pastoral care for children and their families looks like. The book contains contributions from specialists who work with children with mental health issues or profound disabilities, as well as chapters that focus on how best to provide palliative and bereavement care. Includes resources and

activities for use in specialist care situations and tools for assessment, making this a must-have for any paediatric chaplaincy team working in a hospital or hospice.

Arabs and Muslims in the Media Evelyn Alsultany

2012-08-20 After 9/11, there was an increase in both the incidence of hate crimes and government policies that targeted Arabs and Muslims and the proliferation of sympathetic portrayals of Arabs and Muslims in the U.S. media. Arabs and Muslims in the Media examines this paradox and investigates the increase of sympathetic images of “the enemy” during the War on Terror. Evelyn Alsultany explains that a new standard in racial and cultural representations emerged out of the multicultural movement of the 1990s that involves balancing a negative representation with a positive

one, what she refers to as “simplified complex representations.” This has meant that if the storyline of a TV drama or film represents an Arab or Muslim as a terrorist, then the storyline also includes a “positive” representation of an Arab, Muslim, Arab American, or Muslim American to offset the potential stereotype. Analyzing how TV dramas such as *West Wing*, *The Practice*, *24*, *Threat Matrix*, *The Agency*, *Navy NCIS*, and *Sleeper Cell*, news-reporting, and non-profit advertising have represented Arabs, Muslims, Arab Americans, and Muslim Americans during the War on Terror, this book demonstrates how more diverse representations do not in themselves solve the problem of racial stereotyping and how even seemingly positive images can produce meanings that can justify exclusion and inequality.

modern Irish townspeople experienced the urban world through a range of family and associational ties. Migrants inducted through town citizenship and marriage bonded more closely as sisters or brothers of confraternities and guilds, consolidating parish membership. Civic religion saw the integration of religion with town politics and councils, and monastic charity of the friars' hospitals preceded the era of modern municipal welfare. In circumstances of the alienation of the long-settled Catholic townspeople from the state's religious and political Reformation in the seventeenth century, they drew sustenance from the continuity of institutions such as colleges, fraternities and hospitals and forms of coexistence with Protestant fellow-citizens.

Outcome Oriented

Chaplaincy Brent Peery

2020-09-21 Outcome Oriented Chaplaincy (OOC) is a method of chaplaincy care that emphasizes achieving, describing, measuring, and improving the outcomes that

result from a chaplain's work, alongside the parallel framework of evidence-based healthcare. This book examines the underlying principles of OOC and incorporates first-hand accounts of chaplains who have made a measured difference to patients and their families. Brent Peery draws on more than fifteen years of experience within the field of Outcome Oriented Chaplaincy, exploring its evolution and history within the complex culture of healthcare, and how its underlying principles of assessments, interventions, outcomes and documentation are most effectively put into practice. This practical guide will benefit chaplains interested in the approach of OOC, and identify a framework for providing the best spiritual care for those facing life's most difficult moments.
