### **School Science and Mathematics** 1927

*Textbook of Cellulose Chemistry for Students in Technical Schools and Universities* Emil Heuser 1924

*Textbook of Quantitative Analysis* William Thomas Hall 1930

**A Textbook of Materia Medica for Nurses** Archibald Lawrence Muirhead 1924

*College Textbook of Chemistry* William Albert Noyes 1919

*A Textbook of Oceanography* James Travis Jenkins 1921

**Student Reasoning in Organic Chemistry** Nicole Graulich 2022-12-21 Reasoning about structure-reactivity and chemical processes is a key competence in chemistry. Especially in organic chemistry, students experience difficulty appropriately interpreting organic representations and reasoning about the underlying causality of organic mechanisms. As organic chemistry is often a bottleneck for students' success in their career, compiling and distilling the insights from recent research in the field will help inform future instruction and the empowerment of chemistry students worldwide. This book brings together leading research groups to highlight recent advances in chemistry education research with a focus on the characterization of students' reasoning and their representational competencies, as well as the impact of instructional and assessment practices in organic chemistry. Written by leaders in the field, this title is ideal for chemistry education researchers, instructors and practitioners, and graduate students in chemistry education.

**Qualitative Research in STEM** Sherry Marx 2016-07-01 Qualitative Research in STEM examines the groundbreaking potential of qualitative research methods to address issues of social justice, equity, and sustainability in STEM. A collection of empirical studies conducted by prominent STEM researchers, this book examines the experiences and challenges faced by traditionally marginalized groups in STEM, most notably culturally and linguistically diverse students and women. Investigations into these issues, as well as the high dropout rate among engineering students and issues of academic integrity in STEM, come with detailed explanations of the study methodologies used in each case. Contributors also provide personal narratives that share their perspectives on the benefits of qualitative research methodologies for the topics explored. Through a variety of qualitative methodologies, including participatory action research, Indigenous research, and critical ethnography, this volume aims to reveal and remedy the inequalities within STEM education today.

**A Systematic Geography of America** George William Webb 1911

*Crowley's Hygiene of school life* Ralph Henry Crowley 1916

*A Systematic Geography of Europe* George William Webb 1910

*A Textbook of Physiology* Sir Michael Foster 1888

*Teaching Computing* Henry M. Walker 2018-04-24 Teaching can be intimidating for beginning faculty.

Some graduate schools and some computing faculty provide guidance and mentoring, but many do not.

Often, a new faculty member is assigned to teach a course, with little guidance, input, or feedback.

*Teaching Computing: A Practitioner's Perspective* addresses such challenges by providing a solid resource for both new and experienced computing faculty. The book serves as a practical, easy-to-use resource, covering a wide range of topics in a collection of focused down-to-earth chapters. Based on the authors' extensive teaching experience and his teaching-oriented columns that span 20 years, and informed by computing-education research, the book provides numerous elements that are designed to connect with teaching practitioners, including: A wide range of teaching topics and basic elements of teaching, including tips and techniques Practical tone; the book serves as a down-to-earth practitioners' guide Short, focused chapters Coherent and convenient organization Mix of general educational perspectives and computing-specific elements Connections between teaching in general and teaching computing Both historical and contemporary perspectives This book presents practical approaches, tips, and techniques that provide a strong starting place for new computing faculty and perspectives for reflection by seasoned faculty wishing

to freshen their own teaching.

*Textbook of Materia Medica* Aaron Samuel Blumgarten 1926

*A Textbook of Plant Physiology* Nikolai Aleksandrovich Maksimov 1930

*Sm Brief Microsoft Office 97 Prof I/M* Karen K. Vignare 1997-11
