Interventions in Mathematics

Tierney Kennedy 2016-03-10
Addition and Subtraction consistently prove difficult for students to understand. This intervention program has been designed as a targeted approach to catch kids up on multiple years of addition and subtraction concepts that ideally should have been developed in early primary school, but which I have found are often missing for students in middle and upper primary school. Inside you will find diagnostic tasks to uncover misconceptions that are holding kids back from understanding as well as lessons with unique confrontational questions to fix misconceptions for good. These lessons will show you how to lead kids to abandon their wrong ideas and figure out how addition and subtraction work for themselves so that they really understand them and

don't forget what we are teaching.

Target Math Success Subtraction of Larger

Numbers Hope Taylor
2004-03-01 Whether you're looking to build essential math skills for an entire class or provide additional help for a few students, look to the Target Math Success series to help you hit your mark. From easy to more advanced, each book contains multiple opportunities for practice on each specific math skill. Once you determine a skill need, it only takes a minute to target an appropriate practice page that features fun, engaging practice problems. Easy-to-use checkup sheets let you assess a student's progress, and you'll enjoy having parent communications, a student progress chart, and awards all in one resource.

Addition and Subtraction

Natalie 2018-09-18 Addition and Subtraction Workbook

Grade 1 is one of the key stages in your children's education as the groundwork begins during this time - they are curious and eager to learn new things, so solidifying a strong mathematical foundation is comparatively easier. This addition and subtraction (grade 1) workbook is exactly what you need! - This additional and subtraction guide ensures that your child understands and develops key skills - let them understand basic elements of math that will prove to be useful during higher education. - This workbook imparts math in a more fun and enjoyable way as the layout is friendly and appealing - it is a lot less boring and stressful for kids, so you don't have to coax them to practice regularly. - This addition & subtraction workbook contains the clear instructions and step-by-step examples for fast learning - it is essentially a comprehensive and progressive set of learning objectives created to help students succeed in math. - The addition and subtraction

workbook is structured in learning sequence, with skills introduced in one lesson being built on those taught in previous lessons, thus ensuring the student can progress gradually without taking on excess pressure. - Writing in workbook pages, as opposed to typing on a computer, can help kids focus and learn. Writing by hand fires up specific areas of a child's brain, improving the ability to both remember what they learn and to think of new ideas. They boost your child's confidence from an early age as well. Let your kids learn math in school and practice in this maths workbook (addition and subtraction) at home - a balance can thus be achieved. You can ask them to complete a lesson and set a time, in order to keep an eye on speed. So what are you waiting for? Order without further delay! *Page a Day Math Subtraction Book 13: Subtracting 12 from the Numbers 12-24* Janice Auerbach 2018-03-29 Focuses on Subtracting 12 From Numbers 12-24. This book

includes one new subtraction fact every day, (32 pages, 40 daily problems, 14 days of practice, 550 problems per book, 6,500+ per series), handwriting aids, cumulative practice, daily achievements stars, and a completion certificate. Perfect for students in grades 1-4, ages 7+, who have mastered

Addition. Learning Objectives Subtraction proficiency, legible handwriting, number sense, and independent learning. For best results, use this book after Subtraction Books 1-12, the first 12 books in this original subtraction series. Learning math is fun with Page A Day Math books and the encouraging Math Squad, Mo, Zo, Bo, Flo and Jo.

Addition and Subtraction Sessions 1992-09-01 Enhance your lesson plans and reinforce basic math skills with the classroom-tested activities in this packet. They are designed to give children fun ways to practice with addition and subtraction. Each activity includes a stated purpose, list of materials, step-by-step

procedures, and when applicable, suggestions for adapting it. You will also find worksheets for additional practice.

learn them, so you can confidently teach mathematics to primary children. Tried and tested, the fifth edition of Derek Haylock's much loved textbook matches the 2014 curriculum requirements for England. Every chapter integrates children's learning, classroom practice, and teacher's own requirements for subject knowledge, making this the ideal text to guide you through your studies and beyond. More than just a book! The new edition is supported by FREE access to an interactive eBook and a companion website allowing you to use a wealth of teaching and learning resources. You can use the eBook to study where and when you want, and read, annotate and search the book on a tablet, laptop or PC. You can also visit study.sagepub.com/haylock5e to access: Videos by the author introduce core themes of each section and explain key mathematical processes. Links to the National Curriculum specify the statutory requirements for primary

schools in England that relate to the mathematical content of each chapter. Learning and Teaching points highlight important issues you may face in the classroom and provide practical guidance for teaching. Self-assessment questions help check your understanding and provide immediate feedback to see how well you have done. Select SAGE journal articles to support literature reviews and wider reading. Lesson Plan Activities by Ralph Manning support content-focused chapters and contain creative mathematics tasks across the primary age range. A Student Workbook is also available to accompany this book, including over 700 practice problems to help you understand, apply and teach primary mathematics. Derek Haylock is an education consultant and writer with a background in mathematics teaching, teacher education and classroom-based research in mathematics education. Ralph Manning is an independent consultant in primary education. He has

worked as a primary teacher and as a lecturer in primary teacher education for 18 years, following a career in IT.

Math Mammoth Subtraction 1

Maria Miller 2024-04-06 Math

Mammoth Subtraction 1 is a worktext that covers the concept of subtraction, the relationship between addition and subtraction, and the various meanings of subtraction. In the first lesson, Subtraction Is Taking Away, the child learns the basic meaning of subtraction as taking away objects, and learns to write subtractions from an illustration where some objects are crossed out. In the next lesson, the child counts down to subtract, which ties in subtraction with the number line. This is a transitional strategy to solve subtraction problems, because later students will learn more efficient ways to subtract, but it is important conceptually.

The following lesson,

Subtraction and Addition in the

Same Picture, begins the study of the relationship between addition and subtraction. This concept will span several lessons. This first lesson presents two sets of objects, such as blue and white balls, and the student writes both an addition sentence and a subtraction sentence from this illustration. The lesson When Can You Subtract? concentrates on the idea that some subtractions, such as $4 - 5$, are meaningless when you think of taking away. The child also makes subtraction patterns in this lesson. Then we continue studying the connection between addition and subtraction in the lesson Two Subtractions from One Addition. As an example, the child writes both $8 - 3 = 5$ and $8 - 5 = 3$ from the addition $3 + 5 = 8$. This idea ties in with fact families, a concept that is coming up soon. In the lesson Two Parts - One Total, we study word problems that do not involve the idea of taking away but have two parts making up a total. For example, if there are 10

flowers of which some are white and some are red, and seven of them are white, how many are red? Then we study fact families, which means writing two additions and two subtractions using the same three numbers. In the lesson How Many More? students find how many more or how many fewer objects one person has than the other by drawing the objects. This lesson can easily be done with manipulatives if desired. In the very next lesson, "How Many More" Problems and Differences, we continue the theme, this time writing a missing addend addition for problems that ask "how many more." For example, Veronica has 4 marbles and Ann has 6. We write the missing addend sentence $4 + \underline{\quad} = 6$ to find how many more Ann has. In the next lesson the child then learns to write subtraction sentences for such problems.
