Champion student mastery of essential mathematics content in grades 9-12. Part of the Every Student Can Learn Mathematics series, this guidebook provides high school teachers with a framework for collectively planning units of study in a professional learning community (PLC). The authors share tools and protocols for unwrapping standards, generating unit calendars, developing rigorous lessons, and many other essential team actions. Use this resource to discover practical insight into

collaborative planning and inspiring detailed models of unit planning in action: Understand how to collaboratively plan units for high school mathematics. Study the seven unit-planning elements, and learn how to incorporate each in unit designs. Review the role of the PLC at Work® process in enhancing student learning and teacher collaboration. Observe model units for Algebra 1, geometry, and Algebra 2. Receive tools and templates for effective unit planning. Contents: Introduction by Timothy D. Kanold Part 1: Mathematics Unit Planning and Design Elements Chapter 1: Planning for Student Learning of Mathematics in High School Chapter 2: Unit Planning as a Collaborative Mathematics Team Part 2: Transformations on the Coordinate Plane Unit Examples for Algebra 1, Geometry, and Algebra 2 Chapter 3: Algebra 1 Unit--Graphs

of Quadratic Functions Chapter 4: Geometry

Too many high school students, faced with  
mathematics in courses at the level of algebra  
and beyond, find themselves struggling with  
abstract concepts and unwilling to pursue  
further study of mathematics. When students  
curtail their course taking in mathematics, they  
may be impacting their college and career

options. Thus, high school mathematics teachers  
have the responsibility to help students  
recognize the value and importance of  
mathematics while also designing instruction  
that makes mathematics accessible to all  
students. Ball and Bass (2000), as well as other  
mathematics educators, have recognized that  
mathematics teachers not only need to know  
mathematics content and mathematics pedagogy  
(i.e., teaching strategies) but they also need to  
know how these ideas are integrated. This  
mathematical knowledge for teaching is the  
knowledge that teachers of mathematics need  
and it differs from the knowledge that research  
or applied mathematicians must know. This text  
is designed to provide teachers with insights into  
this mathematical knowledge for teaching.  
*Teaching and Learning High School  
Mathematics* is likely different from many other  
texts that you have used. It integrates both  
content and pedagogy to help you develop and  
build your own understanding of teaching. The

text is designed to help you develop “deep conceptual understanding of fundamental mathematics” (Ma 1999) so that you are able to approach mathematics from multiple perspectives with many tools. Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient. Throughout this book, you are encouraged to work in cooperative teams. This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career. Hopefully, you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms. Lesson planning is another element pervasive throughout this text. To help teachers plan for effective student-centered lessons, the Question Response Support (QRS) Guide is introduced in Lesson 1.1 and used throughout the remainder

of the lessons. The QRS Guide is a tool on which teachers may record tasks or questions (Q) for students, expected and observed student responses (R), and teacher support (S) in the form of additional “just enough” questions to support students in their progress on the task. In each unit, teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments. In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete, cohesive lesson plans.
