"Hailing frequencies open" Thomas D. Parham, III 2019-07-15 Star Trek: The Next Generation blended speculative science fiction and space opera in its portrayal of communication. Multiple modes of communication used between characters are presented and the multilevel tapestry of communication in the series is critical in its appeal. This book proposes that these patterns of communication reveal a foundational philosophy of Star Trek (while enticing millions of viewers). These patterns serve both to cause strong empathetic connections with characters and to impel viewers to form relationships with the show, explaining their extreme devotion.

Weapons of the Gods Nick Redfern 2016-04-25 In 1945, the Japanese cities of Hiroshima and Nagasaki became the first and last victims of the atom bomb, the most destructive man-made force our planet has ever known. Or were they just the latest in a long line of Armageddon-level events? Is it possible that our civilization is, in reality, just one of many? Did previous cultures blossom, develop, and thrive, only to destroy themselves, tens or hundreds of thousands of years ago, with the same atomic technology? These are the controversial and thought-provoking questions at the heart of Nick Redfern's Weapons of the Gods, which argues that many ancient civilizations cracked the secrets of the atom, only to become the victims of its awesome, terrifying power. Still others may have been destroyed by hostile aliens with their own nuclear arsenals. Where is the evidence? The answer is shockingly simple: it's everywhere. It's just a matter of knowing where to look for it, from the biblical cities of Sodom and Gomorrah and the ancient Pakistani culture of Mohenjo-daro, Pakistan, to the Lonar Crater in India and the revelations in the Ramayana and Mahabharata, two ancient Sanskrit texts that describe nuclear warfare thousands of years ago.
