

Earth Science Final Review Guide

Dec 5, 2025 · Earth - our home planet - is the third planet from the Sun, and the fifth largest planet. It's the only place we know of inhabited by living things. While Earth is only the fifth largest planet in the solar system, it is the only planet in our solar system with liquid water on the surface. 19 hours ago · Earth, third planet from the Sun and the fifth largest planet in the solar system in terms of size and mass. Its single most outstanding feature is that its near-surface environments are the only places in the universe known to harbor life. See the world from above with high-resolution satellite imagery, explore 3D terrain and buildings in hundreds of cities, and dive into streets and neighborhoods with Street View's 360°... Dec 18, 2025 · This interactive tool allows users to input their name and see it spelled out using stunning Landsat satellite imagery of Earth, providing a unique and personalized view of our planet from space. Earth, like most other bodies in the Solar System, formed about 4.5 billion years ago from gas and dust in the early Solar System. The formation of the ocean and the subsequent development of life occurred during the first billion years of Earth's history.
