How to Teach Psychology: An evidence-informed approach Paul Cline 2025-05-23 Psychology as a subject is more popular in secondary schools than ever before, but achieving deep insights into, and appreciation of, the complexity of human behaviour is a challenge that requires expert guidance and teaching. In addition to teaching the often demanding subject content on their specifications, Psychology teachers must also be experts in inculcating mathematical skills and written communication. All this in students who often start without any prior experience of the subject. This poses serious challenges for teachers' subject knowledge, pedagogy and planning. And yet, until now, little has been written about how to teach Psychology effectively. This book aims to help anyone facing

that challenge. Drawing on a wealth of psychological and pedagogical insights, coupled with years of teaching experience, Paul Cline and Mike Hobbiss provide practical advice and concrete suggestions to support Psychology teachers at all levels. From curriculum choices to the minutiae of in-class decisions, from developing as an individual teacher to leading a Psychology department, this book provides the complete, evidence-informed guide to teaching Psychology.

*2012 GCSE English results* Great Britain: Parliament: House of Commons: Education Committee 2013-06-11 The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to

these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual

must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.
