Cognition-Driven Decision Support for Business Intelligence Li Niu 2009-09-14 Cognition-driven decision support system (DSS) has been recognized as a paradigm in the research and development of business intelligence (BI). Cognitive decision support aims to help managers in their decision making from human cognitive aspects, such as thinking, sensing, understanding and predicting, and fully reuse their experience. Among these cognitive aspects, decision makers' situation awareness (SA) and mental models are considered to be two important prerequisites for decision making, particularly in ill-structured and dynamic decision situations with uncertainties, time pressure and high personal stake. In today's business domain, decision making is becoming increasingly complex. To make a successful decision, managers' SA about their business environments becomes a critical factor. This book presents theoretical models as well practical techniques of cognitiondriven DSS. It first introduces some important concepts of cognition orientation in decision making process and some techniques in related research areas including DSS, data warehouse and BI, offering readers a preliminary for moving forward in this book. It then proposes a cognition-driven decision process (CDDP) model which incorporates SA and experience (mental models) as its central components. The goal of the CDDP model is to facilitate cognitive decision support to managers on the basis of BI systems. It also presents relevant techniques developed to support the implementation of the CDDP model in a BI environment. Key issues addressed of a typical business decision cycle in the CDDP model include: natural language interface for a manager's SA input, extraction of SA semantics, construction of data warehouse queries based on the manger's SA and experience, situation information retrieval from data warehouse, how the manager perceives situation information and update SA, how the manager's SA leads to a final decision. Finally, a cognition-driven DSS, FACETS, and two illustrative applications of this system are discussed.

DescriptionXcelsius 2008 was recently included in SAP's BusinessObjects 4.0 family, rebranding "Xcelsius Enterprise" as "SAP BusinessObjects Dashboards 4.0". With features like flexible design and what-if scenarios, the powerful dashboarding software allows enterprises to make business decisions at a glance, and this book allows you to go far beyond the basics of these techniques. This cookbook full of practical and applicable recipes will enable you to use the full latest capabilities of Dashboard Design to visually transform your business data. A wide range of recipes will equip you with the knowledge and confidence to perform tasks like configuring charts, creating drill-downs, making component colors dynamic, using alerts in maps, building pop-up screens, setting up What-If scenarios, and many more. The recipes begin by covering best practices for using the Dashboard Design spreadsheet, the data-model, and the connection with the components on the canvas, later moving on to some from-the-trenches tricks for using Excel within Dashboard Design. The book then guides you through the exploration of various data visualization components and dashboard interactivity, as well as offering recipes on using alerts, dashboard connectivity, and making the most of the aesthetics of the dashboard. Finally, the recipes conclude by considering the most important add-ons available for Dashboard Design and enabling you to perform relevant and useful tasks straight away. What you will learn Become fully equipped with best practices for using the Dashboard Design spreadsheet Present data using the wide variety of data visualization components Learn how to make dashboard components interactive for an enhanced user experience Take advantage of Dynamic Visibility features on the dashboard Master manipulating the look and feel of your dashboards Gain confidence in using alerts on charts and other components Get to grips with advanced Dashboard Design components like the Trend Analyzer, Fisheye Picture Menu, History Component, and the Canvas Component Optimize the user experience of the dashboard Connect your dashboard to live data sources Export and publish the Dashboard Design model into several environments. Learn about the most applicable add-ons available for your dashboard requirements. Master setting up alerts on charts, gauges, maps and scorecards Who this book is for If you are a developer with a good command and knowledge of creating dashboards, but are not yet an advanced Dashboard Design user, then this is the perfect book for you. You should have a good working knowledge of Microsoft Excel as well as knowledge of basic dashboard practices, though experience of Dashboard Design as a specific dashboard tool is not essential. *Microsoft® SQL Server 2008 R2 Analytics & Data Visualization* Doug Harts 2010-07-06 Microsoft's BI growth rate is twice that of the industry, averaging close to 30 percent annually with analytics growing 40 percent Technical editor is Sean Boon, Microsoft Product Manager for the new Dundas Analytics for SQL Server 2008
