Media, Democracy and Social Change Aeron Davis 2020-09-15 When we are told so regularly that we live in a 'post truth' age and are surrounded by 'fake news', it can be tempting to think of politics as primarily mediated. Discussion and analysis of public affairs is preoccupied with the power and reach of platforms or the passion and rage of social media exchanges. As important as these issues may be, a focus on the communicative risks downgrading the political. Media, Democracy and Social Change puts politics back into political communications. It shows how within a digital media ecology, the wider context of neoliberal capitalism remains essential for understanding what political communications is, and can hope to be. Tackling broad themes of structural inequality, technological change, political realignment and social transformation, the book explores political communications as it relates to debates around the state, infrastructures, elites, populism, political parties, activism, the legacies of colonialism, and more. It is both an expert introduction to the field of political communications, and a critical intervention to help re-imagine what a democratic politics might mean in a digital age. It will be essential reading for students, researchers and activists. Aeron Davis, Natalie Fenton, Des Freedman and Gholam Khiabany all work at the Department of Media and Communication at Goldsmiths, University of London, where they teach together on the MA in Political Communications.

Spin Wars and Spy Games Markos Kounalakis 2018-07-01 As most long-standing news outlets have shuttered their foreign bureaus and print operations, the role of GNNs as information collectors and policy influencers has changed in tandem. Western GNNs are honored for being untethered to government entities and their ability to produce accurate yet critical situational analyses. However, with the emergence of non-Western GNNs and their

direct relationships to the state, the independent nature of our global news cycle has been vastly manipulated. In *Spin Wars and Spy Games*, Kounalakis uses his interviews with an expansive and diverse set of GNN professionals to deliver a vivid depiction of the momentous sea change in mass media production. He traces the evolution of global news networks from the twentieth century to now, revealing today's drastically altered news business model that places precedence on networks leveraging global power. This eye-opening narrative transforms our understanding of why countries like Russia and China invest heavily in their news media, and how the GNN framework operates in conjunction with state strategy and diplomatic sensitivity. Profoundly meticulous and insightful, this seminal work on the current state of transnational journalism gives readers a first-hand look at how global media powers shape policy and morph the public's consumption of information.
