A Multimodal and
Ethnographic Approach to
Textbook Discourse Germán
Canale 2022-08-30 This book
offers a new framework for
analysing textbook discourse,
bridging the gap between
contemporary ethnographic
approaches and multimodality
for a contextually sensitive
approach which considers the
multiplicity of multimodal
resources involved in the
production and use of
textbooks. The volume makes
the case for textbook discourse
studies to go beyond studies of
textual representation and
critically consider the ways in
which textbook discourse is
situated within wider social
practices. Each chapter
considers a different social
semiotic practice in which
textbook and textbook

discourse is involved: representation, communication, interaction, learning, and recontextualization. In bringing together this work with contemporary ethnography scholarship, the book offers a comprehensive toolkit for further research on textbook discourse and pushes the field forward into new directions. This innovative book will be of particular interest to students and scholars in discourse analysis, multimodality, social semiotics, language and communication, and curriculum studies.
