Conservative Government Penal Policy 2015-2021

Christopher David Skinnis
2022-07-28 This book interrogates Conservative government penal policy for adult and young adult offenders in England and Wales between 2015 and 2021. Government penal policy is shown to have been often ineffective and costly, and to have revived efforts to push the system towards a disastrous combination of austerity, outsourcing and punishment that has exacerbated the penal crisis. This investigation has

meant touching on topical debates dealing with the impact of resource scarcity on offenders' experiences of the penal system, the impact of an increasing emphasis on punishment on offenders' sense of justice and fairness, the balance struck between infection control and offender welfare during the government handling of the SARS-CoV-2 pandemic and why successive Conservative governments have intransigently pursued a penal policy that has proved crisis-exacerbating. The overall conclusion reached is that penal policy is too important to be left to governments alone and needs to be recalibrated by a one-off inquiry, complemented by an on-going advisory body capable of requiring governments to 'explain or change'. The book is distinctive in that it provides a critical review of penal policy change, whilst combining this with insights derived from the sociological analysis of penal trends.

Teaching and Time Poverty

Greg Thompson 2024-12-04 As teacher shortages reach a global crisis point, this book explores how time poverty has become a critical factor in the working lives of teachers and school leaders. Arguing that we need to move away from framing the problem of teachers' work as simply workload, this book suggests

that understanding time poverty is the first step in moving toward more manageable working lives. The book brings together international perspectives on teacher time poverty, drawing on theoretical and empirical work to underscore the growing complexity of teachers' work and how this impacts job satisfaction, stress and feeling that there is never enough time to accomplish all that needs to be done. Many policy solutions misdiagnose the problems of teachers' work, simply suggesting it is an issue of workload. The chapters investigate issues of work intensification, finding that teachers are not only working longer, but also working harder as they manage more complex classrooms and policy mandates. This book is essential reading for those interested in understanding how current education policy both produces time poverty and could better identify and respond to the complexities of teachers' work.

The Parliamentary Debates (Hansard). Great Britain. Parliament. House of Lords 2013

2012 GCSE English results
Great Britain: Parliament: House of Commons: Education Committee 2013-06-11 The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the

qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam

systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.

Beyond McDonaldization

Dennis Hayes 2017-04-19

Beyond McDonaldization provides new concepts of higher education for the twenty-first century in a unique manner, challenging much that is written in mainstream texts. This book undertakes a reassessment of the growth of McDonaldization in higher education by exploring how the application of Ritzer's four features efficiency, predictability, calculability and control has become commonplace. This wide-ranging text discusses arguments surrounding the industrialisation of higher education, with case studies and contributions from a wide range of international authors. Written in an accessible style, *Beyond McDonaldization* examines questions such as: Can we regain academic freedom whilst challenging the

McDonaldization of thought and ideas? Is a McDonaldization of every aspect of academic life inevitable? Will the new focus on student experience damage young people? Why is a McDonaldized education living on borrowed time? Is it possible to recreate the university of the past or must we start anew? Does this industrialisation meet the educational needs of developing economies? This book brings international discussions on the changing world of higher education and the theory of McDonaldization together, seeking to provide a positive future vision of higher education. Analysing and situating the discussion of higher education within a wider social, political and cultural context, this groundbreaking text will have a popular appeal with students, academics and educationalists. *Integration & Trade* 2000
