Inventors and Inventions Alvin K. Benson
2010 This work features in-depth critical essays on important men and women inventors of all time, from around the world. Plus, free online access to the full content of this remarkable reference set is available. The printed reference includes: four volumes, including 2,048 pages; 409 essays and 409 sidebars; hundreds of photos, illustrations and graphs; and, appendixes, indexes and resource listings. Features of the online subscription include: fully supported; complimentary online access; unlimited users at your library; full access from home or dorm room; immediate access via online registration; a simple, intuitive interface; user profile areas for students and patrons; sophisticated search functions; complete

content, including appendixes; and, fully illustrated. "Great Lives from History: Inventors and Inventions" features 409 essays covering 413 individual inventors (including 27 women) from all time, worldwide. All essays were written specifically for this new publication. The editors have included in this set those inventors recognized for shaping modern technology and the way we live today - coverage that is essential in any liberal arts curriculum. The editor's criteria for including these individuals in this publication took into account their fame as inventors, the significance of their inventions, the amount of time they spent inventing, their representation of world inventors, their relevance to class curricula, and their interest to high school, undergraduate, and general readers. For purposes of this publication, the

term 'invention' was defined to include not only mechanical and other physical devices but also processes (e.g., the Bessemer process for making steel), software (such as Grace Hopper's invention of COBOL), and systems such as those applied to business management. Pure scientific theories (such as laws of physics) were excluded, although rare exceptions were made for such systems and tools that have had an comprehensive influence on our way of interacting with the world, such as Aristotle's invention of the first system of biological taxonomy, Newton's creation of the calculus, and Einstein's theories of relativity.

Contemporary Black Biography Tom

Pendergast 2006-03 Three times a year, this extraordinary reference series provides biographical profiles of important persons of African heritage. Whether they are personalities from the news, selected 20th-century notables, or individuals who are not yet household names, these are the men and women who are changing today's world and shaping the world of tomorrow. Each volume of Contemporary Black Biography contains at least 65 full-length biographies written in an easy-to-follow prose style, ranging from 2 to 4 pages each. Arranged alphabetically, entries are divided by subheads for quick scanning. Sections cover: Portrait (as available) Date and place of birth Educational background Address Career data Memberships Awards received Detailed prose essay Complete source citations Contemporary Black Biography is not limited to coverage of only notable black Americans, nor is it restricted

by a manufactured definition of "contemporary." Its multinational coverage spans this century and includes rising personalities as well as groundbreakers and newsmakers in a variety of fields. Contemporary Black Biography includes four cumulative indexes: Nationality: While concentrating on U.S. figures, this title also covers important personalities from other countries. Find them listed by nationality here. Occupation: Editors focus on biographies not typically found in other sources -- an eclectic blend of well-known and well-respected educators, physicians, politicians, activists, writers, clergy, military leaders, attorneys, as well as members of the more glamorous occupations such as athletes, fashion models and actors. Subjects: Events, places and organizations are cross-referenced to each entry. Use this index to identify key black individuals associated with such topics as the NAACP, the Montgomery Bus Boycott, Motown Records, Medicine, the Olympics and hundreds of others. Name: As the

only series devoted exclusively to black biography, Contemporary Black Biography's name index is the first place to look when you need information on contemporary black figures. Entries in the Contemporary Black Biography series can be accessed online through Gale Biographies on NEXIS. Each of the more than 100,000 profiles in Gale Biographies provides an intimate glimpse into the personal and professional life and times of the listee, including: birth/death date and place, family, education, career highlights and achievements, awards and honors, major works, sources of additional information and much more.

Description

Blacks in the Military and Beyond G.L.A. Harris
2019-07-31 African Americans have long used the military for gaining legitimacy and as the ultimate path to citizenship. *Blacks in the Military and Beyond* thoughtfully chronicles their tumultuous journey from slavery through the present, extending the ourstory to pre-service, in service and post-service economic considerations as significant factors in determining whether or not serving in the military has advantaged Blacks, and how such mechanisms like the periodic drawing down of forces have impacted Blacks overall. G.L.A. Harris and Evelyn L. Lewis delve into the role of the military as a conduit in helping to create and sustain the Black middle class, challenging the military to be more strategic as to the long term effects of its decisions to be ever mindful of upholding its moral compact with African Americans.

African Americans in Science Charles W. Carey

Jr. 2008-10-23 This encyclopedia provides the most complete treatment to date of the accomplishments of African American scientists—and the struggles of African Americans to find their place in the scientific community. This comprehensive reference work sheds new light on an aspect of African American life that is often overlooked. More than a summary of individuals and accomplishments, *African Americans in Science: An Encyclopedia of People and Progress* explores the entire experience of African Americans seeking a place in the scientific community—not just the triumphs but the frustrations, discriminations, and the efforts to support (and sometimes impede) African American scientists. *African Americans in Science* offers alphabetically organized entries in three areas: the contributions of African Americans in over 30 different fields of science and medicine, schools and organizations that played a role in the development of African

American scientists, and additional topics related to African American scientists. No other reference offers such a complete and up-to-date portrait of the pivotal work of African Americans across the spectrum of scientific research and what it took to achieve it.

Blacks and Science Volume Two Robin

Walker 2013-10-16 Blacks and Science Volume Two Did YOU know any of the following facts? o The Bamoun Kingdom, now in today's Cameroon, has 7,000 surviving manuscripts in their own script o Timbuktu astronomers used the cosine, tangent, cotangent, secant and cosecant functions of trigonometry o The Dogon of Mali had an early and wholly indigenous notion of 'big bang' derived from a singularity o A number of iron and copper tools were excavated in Senegal that dated from 2800 BC o The total amount of gold mined in the desert regions of West Africa to the year 1500 was \$35 billion at 1998 gold prices o A surviving sixteenth century Timbuktu manuscript has a formula for making toothpaste

and adds that regular brushing of your teeth removes bad breath o A 1342 text published in Cairo mentions two royal Malian voyages sailing across the Atlantic involving hundreds of vessels o The Royal Palace of the Ashanti Empire contained a suite of apartments on its upper floor that reminded a visitor to the palace of Wardour Street in Central London o Glass was manufactured at the Yoruba capital of Ile-Ife in the sixth century o According to New Scientist, there are even surviving Timbuktu manuscripts that deal with climatology Blacks and Science Volume Two is largely a synthesis of previously published Kindle e-books or lecture-essays West African Contributions to Science and Technology combined with Intellectual Life and Legacy of Timbuktu. However, new information not present in either e-book has been added on East Africa. This book is a general introduction to the role played by the West and East Africans in the evolution of Mathematics, Astronomy & Physics, Metallurgy, Medicine & Surgery, Boat Building
