Pacific Symposium on Biocomputing 2008 Russ B. Altman 2008 The Pacific Symposium on Biocomputing (PSB) 2008 is an international, multidisciplinary conference for the presentation

and discussion of current research in the theory and application of computational methods in problems of biological significance.

Presentations are rigorously peer reviewed and are published in an archival proceedings volume.

PSB 2008 will be held on January 4-8, 2008 at the Fairmont Orchid, Big Island of Hawaii.

Tutorials will be offered prior to the start of the conference. PSB 2008 will bring together top researchers from the US, the Asian Pacific nations, and around the world to exchange research results and address open issues in all aspects of computational biology. It is a forum for the presentation of work in databases, algorithms, interfaces, visualization, modeling, and other computational methods, as applied to biological problems, with emphasis on applications in data-rich areas of molecular biology. The PSB has been designed to be responsive to the need for critical mass in sub-disciplines within biocomputing. For that reason, it is the only meeting whose sessions are defined dynamically each year in response to specific proposals. PSB sessions are organized by leaders of research in biocomputing's hot topics. In this way, the meeting provides an early forum for serious examination of emerging methods and approaches in this rapidly changing field.

Revisiting Race in a Genomic Age Barbara A. Koenig 2008 With the completion of the sequencing of the human genome in 2001, the debate over the existence of a biological basis for race has been revived. Interdisciplinary scholars here examine the new social, political and ethical concerns that are attached to how we think about emerging technologies and their impact on conceptions of race.

The Analysis of Biological Data Michael Whitlock 2009 This text emphasizes intuitive understanding rather than an over-reliance on formulas. The focus is on data and graphical displays rather than the mathematical foundations of statistics, and students do not need knowledge of mathematics beyond simple algebra.
