Army Techniques Publication Atp 3-90.90 Army Tactical Standard Operating Procedures November 2011 United States Government US Army 2012-09-10 Army Techniques Publication (ATP) 3-90.90 facilitates development of standard operating procedures (SOPs) in order to enhance efficiency and adaptability across the force. ATP 3-90.90 achieves this purpose through linking to a

milWiki portal under the milSuite uniform resource locator (URL) containing guidance for tactical SOPs and unclassified examples of SOPs for reference. The SOP portal provides a baseline for developing new SOPs quickly and a forum for improving existing SOPs. The portal presents best practices consistent with doctrinal principles. Soldiers developing SOPs for their units are encouraged to apply critical thinking while referring to the models and other resources to aid their own content development. At a minimum, portal users must be familiar with this ATP, Field Manuals (FMs) 5-0 and 6-99.2; Army Regulations (ARs) 25-1, 34-4, and 380-5; and Department of the Army Pamphlet (DA Pam) 25-403. Soldiers are encouraged to use the portal to collaborate, to improve the portal's contents, and to upload new SOP examples. The

SOP portal is secure and requires an Army Knowledge Online or Defense Knowledge Online login. The portal's contents are unclassified. Neither this manual nor the SOP portal is intended to regulate the appearance or content of unit SOPs. Note. In June 2010, JP 3-31 changed standing operating procedure to standard operating procedure. The meaning is unchanged. The doctrine in this manual provides techniques for developing unit tactical SOPs. Units throughout the Army can take advantage of technology to obtain guidance, collaborate in real time, and find information quickly. This manual and the SOP portal are intended to enhance operational adaptability Army-wide. In the short term, the information in the SOP portal will help units establish or improve SOPs more rapidly. In the long term, the intention is that more and more units will build SOPs using the portal and the doctrine in this manual. Ideally, SOPs throughout the Army should increase in similarity as the combination of doctrinal

guidance and Army-wide milWiki collaboration facilitates consensus. This will help units communicate and coordinate with one another more easily. Reassigned Soldiers and units will become familiar with SOPs in their new assignments more quickly. Chapter 1 of this ATP discusses resources for integrating SOP development with collaborative technology, doctrine, and policy. Chapter 2 discusses a process to help authors develop effective SOPs. Chapter 3 provides the SOP portal's URL and detailed instructions on how to use the portal. To enhance standardization of tactical SOPs, the SOP portal provides tactical SOP guidance organized according to the Army operation plan and order format. For the reader's convenience, chapter 3 of this manual shows a list of attachments and responsible staff officers as table 3-1 (pages 3-4 to 3-7). Table 3-1 serves as an approximate table of contents for the information under the portal's tactical SOP guidance tab. Because the volume and variability

of material in the portal, providing a fixed listing of the portal's contents in this ATP is not practical. Unit SOP examples are organized under the portal's categories tab (described in chapter 3). The general categories used for SOP examples are nondoctrinal and variable; they will expand or change as Soldiers modify them.

Equipment Parameters Required for Army Tactical Airspace Regulation System C. W. Wightman 1967 The effort described in this report is part of a continuing effort to define the requirements of future Army air traffic regulation systems, and is in particular aimed at establishing the Automatic Data Processing (ADP), man/machine interface, and communications systems requirements. The report defines the ADP, peripheral, and man/machine functional and equipment requirements of an Army Tactical Airspace

Regulation System. Computer memory size, word length, speed, as well as display Input/Output techniques are postulated. Equipment reliability, availability, and manual backup capability is also defined. In addition, the special requirements of aircraft navigation and stationkeeping; and time-synchronized systems are covered. (Author).

Subcommittee on U.S. Army Environmental Hygiene Agency Toxicology Program 1991

The U.S. Army in Transition II Frederic Joseph Brown 1993 "The U.S. Army again faces a major turning point. Having proven in the Gulf War that it has fully recovered from its post-Vietnam low, it must adapt to the high-technology challenges of the Information Age in a post-Cold War world of reduced defense expenditures. The last time the Army was drastically downsized - just after World War II -

the result was the nearly catastrophic rout of its forces in Korea. This is a lesson that forward-thinking soldiers, such as the author of *The U.S. Army in Transition II*, have not forgotten.

Former chief of the Army's armor forces and coauthor of the landmark 1973 work *The United States Army in Transition (I)*, Lt. Gen. Frederic J. Brown was one of the key thinkers behind the Army's recent successes. His latest book establishes the next creative framework for dealing with the tough issues facing today's custodians of U.S. landpower. It will stimulate discussion among all concerned with America's security at this watershed in world history."--

Army Tactical Standard Operating Procedures (ATP 3-90. 90) Department Army 2012-09-28

Army Techniques Publication (ATP) 3-90.90 facilitates development of standard operating procedures (SOPs) in order to enhance efficiency and adaptability across the force. ATP 3-90.90 achieves this purpose through linking to a milWiki portal under the milSuite uniform resource locator (URL) containing guidance for tactical SOPs and unclassified examples of SOPs for reference. The SOP portal provides a baseline for developing new SOPs quickly and a forum for improving existing SOPs. The portal presents best practices consistent with doctrinal principles. The Combined Arms Doctrine Directorate established the SOP portal in 2009. The authors attempted to align the original information with pertinent doctrine and regulations. Where the portal's contents differ from current doctrine and regulations, the latter take precedence. The information in the SOP portal is not authoritative doctrine. The examples in the portal do not provide ready-to-use SOPs for Army units. Soldiers developing

SOPs for their units are encouraged to apply critical thinking while referring to the models and other resources to aid their own content development. At a minimum, portal users must be familiar with this ATP, Field Manuals (FMs) 5-0 and 6-99.2; Army Regulations (ARs) 25-1, 34-4, and 380-5; and Department of the Army Pamphlet (DA Pam) 25-403. Soldiers are encouraged to use the portal to collaborate, to improve the portal's contents, and to upload new SOP examples. The SOP portal is secure and requires an Army Knowledge Online or Defense Knowledge Online login. The portal's contents are unclassified. Neither this manual nor the SOP portal is intended to regulate the appearance or content of unit SOPs. This ATP uses joint terms where applicable. When formal military terms are identified in the text of this ATP, the terms are italicized and the number of the proponent manual follows the definition. A standard operating procedure is a set of instructions covering those features of

operations which lend themselves to a definite or standardized procedure without loss of effectiveness. The procedure is applicable unless ordered otherwise (JP 3-31). A SOP is both standing and standard: it instructs how to perform a prescribed and accepted process established for completing a task. Features of operations that lend themselves to standardization are common and usually detailed processes performed often and requiring minimal variation each time. Well-written and properly used unit tactical SOPs enhance effective execution of tasks; the benefits of SOPs are numerous. They reduce training time, the loss of unwritten information, the commission of errors, the omission of essential steps or processes, and the time required for completion of tasks. This does not mean, however, that carrying out SOPs never requires thought or that SOPs should never change. Indeed, tactical units must change some operating procedures as rapidly as operational

environments and missions change. The SOP portal helps units avoid an unnecessary loss of effectiveness that could occur by maintaining unthinking dependence on outdated written procedures. The portal also helps units avoid a loss of effectiveness that could occur when units delay writing down processes that need to become standardized. The doctrine in this manual provides techniques for developing unit tactical SOPs. Units throughout the Army can take advantage of technology to obtain guidance, collaborate in real time, and find information quickly. This manual and the SOP portal are intended to enhance operational adaptability Army-wide. In the short term, the information in the SOP portal will help units establish or improve SOPs more rapidly. In the long term, the intention is that more and more units will build SOPs using the portal and the doctrine in this manual. SOPs throughout the Army should increase in similarity as the combination of doctrinal guidance and Army-

wide milWiki collaboration facilitates consensus.
