

Assessing Human Rights Values An Empirical Approach

Assessing Human Rights Values (An Empirical Approach) Rajani Ranjan Singh 2014-11-24
Human rights are fundamental and should be considered natural to all human beings. Man is born with some rights which exist whether or not they are recognized by society. All these rights and development are interrelated. Human right values are a growing subject and are tempted to bring into the text as much material as possible. Education being concerned with human beings and with their orientation for future does play a fundamental role. It provides individuals with the capacity and motivation to act. It becomes very important to understand right in the very beginning that the term human "rights" implies universality. These rights exist for each of us because we are human

beings. That is why; it becomes very important for all the children to know about human rights from the very beginning. Thus, the issues of the development of the human rights value in the school are very important. Writing this book is an endeavour to understand the basic connotation of human rights from empirical perspective.

Reclaiming Value in International Development Chloe Schwenke 2009

International development has complex unintended effects on the realities of equity, rights, governance, and conflict in poor countries. Yet the myriad moral questions and quandaries encountered at every turn by development policymakers and practitioners are seldom thought about or articulated in a rigorous fashion. Instead, development

specialists are trained to focus on the technocratic aspects of economic aid delivery and to disregard the moral issues raised by the adverse collateral consequences of aid programs for many people, communities, institutions, and environments in the developing countries. *Reclaiming Value in International Development* is the first book to bridge the divide between ethics and development from the perspective of a seasoned development practitioner who is also a trained ethicist. Schwenke formally enlarges the concept of development to include its moral dimension, to denote beneficial change that alleviates human misery and environmental degradation in poor countries and reinforces universal ethical norms such as human dignity, essential freedoms, social justice, peace, civic virtue, human flourishing, the common good, gender equality, safety and security, and participation and inclusion. She applies this ethically expanded concept to nine key topics in international development: education,

leadership, procurement, food security, conflict, urbanization, gender identity and sexual orientation, deliberative participation, and the measurement of ethical performance. Throughout the book, the author draws on her thirty years of experience as a development practitioner in thirty poor countries around the world to give vivid real-life illustrations of the classic moral dilemmas in development ethics and to show how moral reasoning can clarify and resolve them.

Research in Law and Policy Studies Stuart S. Nagel 1995-05 This third volume in the series discusses a variety of topics, including law and economic reasoning; constitutional policy evaluation; systems analysis and legal policy studies; law and economic organization; and rule-based legal retrieval software.

Ethics, Law and Human Rights in

Psychiatric Care Claes-Göran Westrin 2000
Mirrors of Justice Kamari Maxine Clarke 2010
Mirrors of Justice is a groundbreaking study of the meanings of and possibilities for justice in the contemporary world. The book brings together a group of both prominent and emerging scholars to reconsider the relationships between justice, international law, culture, power, and history through case studies of a wide range of justice processes. The book's eighteen authors examine the ambiguities of justice in Europe, Africa, Latin America, Asia, the Middle East, and Melanesia through critical empirical and historical chapters. The

introduction makes an important contribution to our understanding of the multiplicity of justice in the twenty-first century by providing an interdisciplinary theoretical framework that synthesizes the book's chapters with leading-edge literature on human rights, legal pluralism, and international law.

Assessments in Forensic Practice Kevin D. Browne 2017-05-08

Debates in Religious Education L. Philip Barnes 2023-08-10
This essential book provides a comprehensive introduction to current debates in religious education. Exploring the rich variety of opinions and ideas that constitute and impact upon religious education, both novice and

experienced teachers will benefit from deepening their theoretical knowledge and understanding through reading *Debates in Religious Education*. This second edition has fully updated all chapters and included an additional thirteen new contributions, providing a provocative yet informative introduction to current debates and allowing teachers to reach informed decisions about how they approach this subject. Responding to recent controversy and challenging assumptions about the place of religion in education, expert contributors cover key topics such as: The aims of religious education Religious education in the United Kingdom and Ireland Agreed syllabuses and the role of Standing Advisory Councils Educational issues, such as the right of withdrawal, collective worship, and faith schools Teaching and learning in religious education Multi-faith religious education Relating science and religion. With its combination of expert opinion and fresh insight, this essential text is the ideal companion for any

student or practising teacher engaged in initial training, continuing professional development or Master's-level study.

Human Rights and Ocean Governance Mara Ntona 2023-12-12 This book argues for the

utility of human rights in the practice of ocean governance. Maritime spatial planning (MSP) has become the dominant marine management paradigm, with MSP frameworks already at various stages of elaboration and implementation in more than half of all coastal states. However, as experience with MSP accrues, a central systemic shortcoming has become apparent, insofar as the normative frameworks that underpin MSP tend to be grounded in a rationalistic and economic worldview. The result is a post-political, neoliberal approach to the implementation of MSP, which favours technocratic 'fixes' to complex societal problems over efforts to address underlying issues of power and inequality. Building upon the new field of critical MSP studies, this book offers a much-neglected legal contribution. More specifically, it analyses the extent to which law, and particularly human rights law, can be utilised to meaningfully challenge the unjust patterns of human-ocean

interaction that MSP preserves or creates, and so provide a vehicle for the formulation and realisation of transformative blue futures. The book looks to human rights as norms that are uniquely capable of bringing into relief the values, cause-and-effect relationships, and uncertainties that prevailing capitalist-industrial framings of the ocean tend to downplay or, worse, disregard. And so, from a more pragmatic viewpoint, the book argues that the policy and advocacy tools associated with human rights can be used within MSP processes to foster patterns of human-ocean interaction which are more conducive to social and environmental justice. This book will be of interest to legal and planning scholars, geographers, and others concerned with ocean governance and the 'blue turn' in the social sciences and humanities more generally.
