**Handbook for Preparing Engineering Documents** Joan G. Nagle 1996 State-of-the-art in its simple, user-friendly presentation, this comprehensive handbook covers the entire process of preparing, producing, and distributing engineering documents using current computer software and the most recent technologies in information transfer. From developing concepts to effectively reaching an audience, Handbook for Preparing Engineering Documents provides everything the engineer needs to know for document preparation, production, and distribution in clear, user-friendly language. Extensive indexing and cross-referencing make it possible to find answers quickly.

**Writing for the Computer Industry** Kristin R. Woolever 1994 The computer industry's need for technical writers and editors has expanded almost as rapidly as its technology. Explaining the hardware or software, instructing the user, and contributing to the company's marketing efforts can pose problems for even the most seasoned of writers. This book is specifically designed to help the technical writers and technical writing students understand the basics of writing computer documentation. It takes readers beyond traditional writing techniques, and gives practical advice about getting the job done.
