The Photographer's Website Manual Philip Andrews 2003 The Internet is the biggest communication tool since the telephone, and photographers can benefit from it more than most. Many successful photographers now have their own websites: whether it be to sell their work, or simply exhibit it, there is no simpler, faster and more effective way to reach an audience at any given time, anywhere. This book looks at precisely that, offering practical advice on setting up a website, discussing the technical and aesthetic considerations involved, analysing a selection of successful websites, and exploring the commercial possibilities of this new, ever-expanding technology.
