A Multimodal and

Ethnographic Approach to

Textbook Discourse Germán

Canale 2022-08-30 This book

offers a new framework for

analysing textbook discourse,

bridging the gap between

contemporary ethnographic

approaches and multimodality

for a contextually sensitive

approach which considers the

multiplicity of multimodal

resources involved in the

production and use of

textbooks. The volume makes

the case for textbook discourse

studies to go beyond studies of

textual representation and

critically consider the ways in

which textbook discourse is

situated within wider social

practices. Each chapter

considers a different social

semiotic practice in which textbook and textbook discourse is involved: representation, communication, interaction, learning, and recontextualization. In bringing together this work with contemporary ethnography scholarship, the book offers a comprehensive toolkit for further research on textbook discourse and pushes the field forward into new directions.

This innovative book will be of particular interest to students and scholars in discourse analysis, multimodality, social semiotics, language and communication, and curriculum studies.
