College Textbooks Melissa Emrey-Arras 2013-07-11 The rising costs of postsecondary education present challenges to maintaining college affordability. Textbooks are an important factor students need to consider when calculating the overall cost of attending college. In an effort to ensure that faculty and students have sufficient information about textbooks, Congress included requirements in the Higher Education Opportunity Act (HEOA) concerning publisher and school disclosures, as well as publisher provision of individual course materials. This report addresses (1) the efforts publishers have made to provide textbook information to faculty and make bundled materials available for sale individually, and how these practices have informed faculty selection of course materials; and (2) the extent to which postsecondary schools have provided students and college bookstores access to textbook information, and what the resulting costs and benefits have been. [A Multimodal and Ethnographic Approach to Textbook Discourse](#) Germán Canale 2022-08-30 This book offers a new framework for analysing textbook discourse, bridging the gap between contemporary ethnographic approaches and multimodality for a contextually sensitive approach which considers the multiplicity of multimodal resources involved in the production and use of textbooks. The volume makes the case for textbook discourse studies to go beyond studies of textual representation and critically consider the ways in which textbook discourse is situated within wider social practices. Each chapter considers a different social semiotic practice in which textbook and textbook discourse is involved: representation, communication, interaction, learning, and recontextualization. In bringing together this work with contemporary ethnography scholarship, the book offers a comprehensive toolkit for further research on textbook discourse and pushes the field forward into new directions. This innovative book will be of particular interest to students and scholars in discourse analysis, multimodality, social semiotics, language and communication, and curriculum studies.

The Politics of the Textbook Michael W. Apple 1991 The Politics of the Textbook analyzes the political, economic and cultural factors that shape the production, distribution and reception of school texts.
